Footnote Legend

0 patients: No patients met the criteria for inclusion in the measure calculation.

1. The number of cases is too small (n<25) for purposes of reliably predicting hospital performance.
2. Measure reflects the hospital's indication that its submission was based upon a sample of its relevant discharges.
3. Rate reflects fewer than maximum possible quarters of data.
4. Inaccurate information submitted and suppressed for one or more quarters.
5. No data are available for publication from the hospital for this measure.

PN-7 is reported by Flu Season ONLY

Footnote Legend

6. Fewer than 100 patients completed the HCAHPS survey. Use these rates with caution, as the number of surveys may be too low to reliably assess hospital performance.
7. Survey results are based on less than 12 months of data.
8. Survey results are not available for this reporting period.
9. No or very few patients were eligible for the HCAHPS survey. The scores shown, if any, reflect a very small number of surveys.
11. There were discrepancies in the data collection process.
