EXECUTIVE SUMMARY

Introduction & Purpose

Parkview Health is pleased to share the 2022 Community Health Needs Assessment (CHNA) for Parkview Wabash Hospital, Inc. in Wabash County. This report provides an overview of the approach taken to identify and prioritize significant health needs in Wabash County, as federally required by the Affordable Care Act. The Health Services and Informatics Research (HSIR) group at Parkview’s Mirro Center for Research and Innovation designed and conducted both primary and secondary data collection and analysis activities. Data collection was focused on the eight counties in northeast Indiana that comprise Parkview’s primary service area and where a Parkview hospital is located, including: Allen, DeKalb, Huntington, Kosciusko, LaGrange, Noble, Wabash and Whitley.

The purpose of this CHNA report is to offer a comprehensive understanding of the health and social needs of Wabash County to guide Parkview Wabash Hospital, Inc.’s strategic community health improvement plan for addressing the identified needs (*CDC - Assessment and Plans - Community Health Assessment - STLT Gateway, 2019*). Parkview Wabash Hospital, Inc. will use the findings in this report to identify and develop efforts to improve the health and quality of life for residents in the counties we serve.

Approach

The HSIR group assessed the overall health needs of the Parkview Health region, as well as the needs of each individual county. Community health needs of interest were based on past CHNAs and secondary data from the Healthy Communities Institute (HCI) database. The HSIR team used surveys to gather input from individual community members and healthcare and social service providers (i.e., physicians, nurses, social workers) to understand local health concerns, needs, and service availability.

Historically, we have found that Hispanic, Amish and people of Burma (Myanmar) populations have been an underrepresented voice in our CHNA surveys. Thus, the HSIR group used contacts familiar to these populations to distribute surveys and sent a mobile team of surveyors to target locations to ensure that we captured the community health concerns of these special populations.

Summary of Findings

The findings in this report are a result of the analysis of an extensive set of secondary data (over 200 indicators from national and state data sources) and primary data (209 surveys) collected from community members and healthcare/social service providers. Below are the top ten health concerns and health service needs as ranked by the Hanlon method and survey data, respectively.

Wabash County’s Top Ten Health Concerns*

- Mental health
- Chronic obstructive pulmonary disease
- Asthma
- Obesity
- Kidney disease
- Cardiovascular disease (stroke, coronary heart disease)
- Cancer
- Alzheimer’s disease/dementia
- Substance use/abuse (drugs, alcohol, tobacco)
- Diabetes

* After Hanlon method applied to secondary and primary data; merged categories of concerns are in parentheses

Wabash County's Top Ten Health Service Needs*

- Substance use disorder services
- Mental health services
- Access to healthy food
- Childcare
- Health insurance
- Senior services
- Job training
- Gun safety
- Access to primary care providers
- Access to birth control

* As indicated by community and provider concerns expressed in survey data

Prioritized Areas

In September 2022, Parkview Wabash Hospital held a community meeting to engage Wabash County community leaders to select two additional health priorities for the county over the next three years. The areas of education, government, social service agencies and recreation were all represented in the meeting, along with members of the Parkview Wabash Hospital administrative team. In addition to the priority ranking scores, these community stakeholders considered significance, severity, suitability, and health disparity related to Social Determinants of Health. Substance Abuse/Use and Obesity were selected as top priorities for Wabash County, along with Mental Health, the Parkview Health systemwide selected priority.

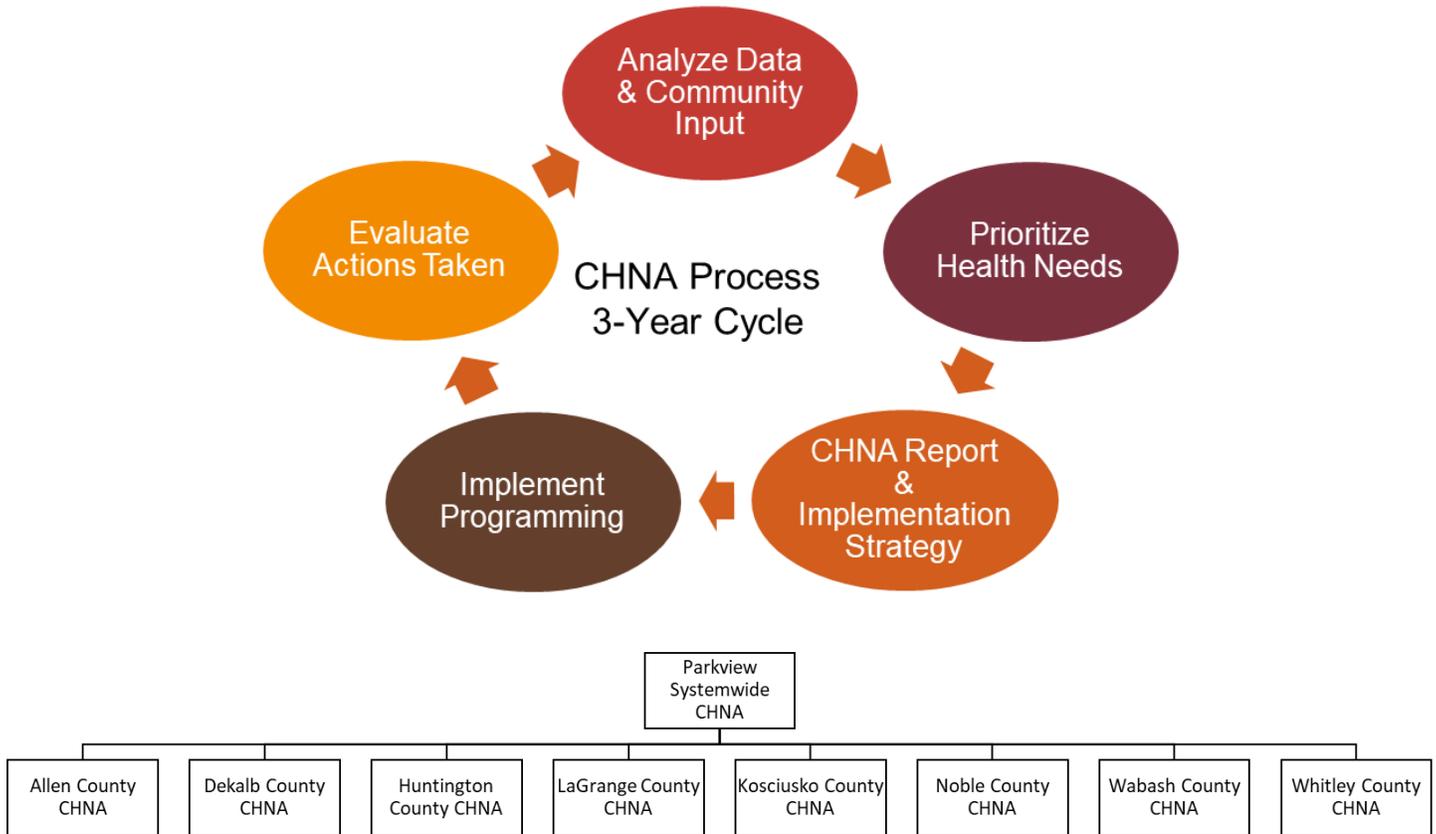

HSIR Group

The Parkview Community Health Improvement department commissioned the Parkview Health Services and Informatics Research (HSIR) group to conduct its 2022 Community Health Needs Assessment (CHNA). The HSIR group is co-located with the Clinical Research group in the Parkview Research Center, which is housed in an 82,000 square foot facility, the Mirro Center for Research and Innovation, with more than 90 rooms and dedicated spaces for research, innovation, and education. HSIR employs multiple research staff, which includes PhD prepared scientists, user experience specialists and project managers. As a research unit embedded in Parkview Health, HSIR has dedicated time to support initiatives that require research skills, such as the CHNA.

Evaluation of Progress Since 2019 CHNA

The CHNA is a continual process that rotates through a three-year cycle (Figure 1). A key component of this process is evaluating the impact of the programming implemented in response to the prioritized health concerns. Reflecting on the progress made on priority areas facilitates the development of strategies to implement in the next CHNA cycle.

Figure 1. Three-Year CHNA Process; Organization of Parkview CHNA reports

Priority Health Needs and Impact from 2019 CHNA

During the 2019 prioritization sessions, substance abuse and mental health were selected as the Parkview Health region’s shared health priority for 2020-2022. Additionally, each Parkview licensed hospital selected two other priorities per their county level CHNA report. This report reflects Parkview Wabash Hospital, Inc., but each of Parkview’s licensed hospital facilities have their own CHNA that reflect priorities specific to their county. The impact report for Parkview Wabash Hospital, Inc. can be found in Appendix A. Parkview did not get any written comments in response to our 2019 CHNA.

Parkview did not get any written comments in response to our 2019 CHNA. If you have comments about the 2022 CHNA, please send to Jill.McAllister@parkview.com or Sarah.GiaQuinta@parkview.com.

INTRODUCTION

Parkview Health presents findings from its 2022 Community Health Needs Assessment (CHNA), a requirement for all not-for-profit hospitals to complete every three years (*Community Health Needs Assessment for Charitable Hospital Organizations - Section 501(r)(3) | Internal Revenue Service, n.d.*). This report provides an overview of the CHNA processes and methods used to identify and prioritize significant health needs for the community. The purpose of this report is to present information about the health concerns and service needs across Parkview Health’s service area to create understanding and establish priorities around these issues. Attention has been given to identify needs of specific community populations, significant health concerns or service gaps and feedback from community members and providers.

About Parkview Health

Parkview Health is a not-for-profit, community-based health system serving a population of more than 895,000. With more than 14,000 employees, Parkview is the region’s largest employer. Parkview has been serving the community since its early beginnings as Fort Wayne City Hospital in 1878. Parkview Health System formed in 1995, and the heritage of care and compassion continues today with 11 hospitals and a physician’s group of over 800 clinicians across 45 clinical specialties.

Parkview Health Mission & Vision

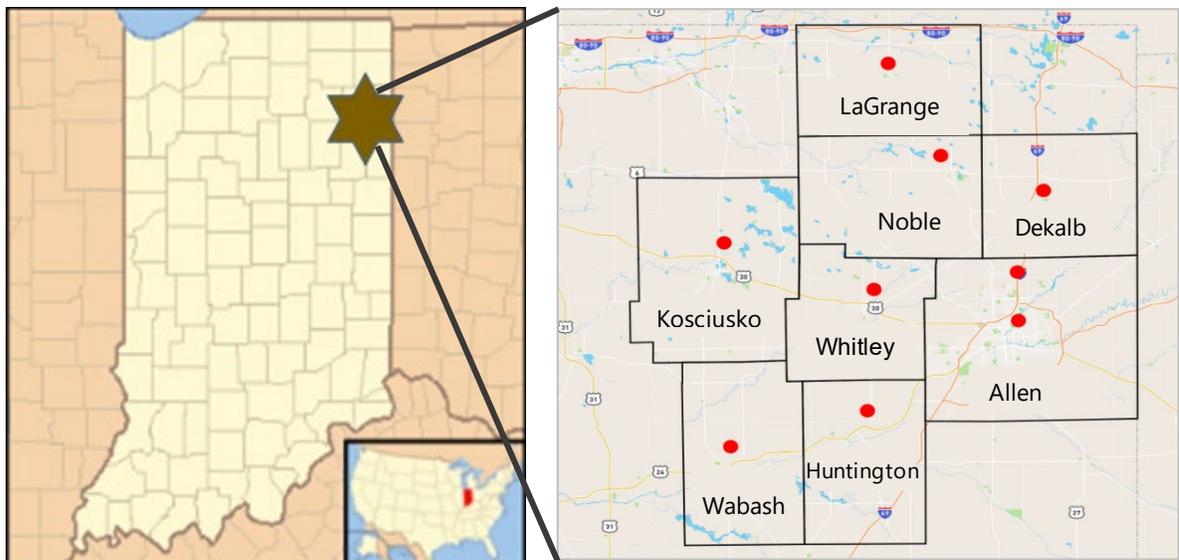

Parkview’s mission is to improve the health of our community members and inspire them to take steps to improve their well-being.

Parkview puts their patients at the center of everything they do, as an individual, as an employer and as our community.

Service Area

The scope of this CHNA has been narrowed to reporting data at a county level. Full-service Parkview Health hospitals are in the northeast Indiana counties of Allen, DeKalb, Huntington, LaGrange, Noble, Wabash and Whitley Counties. Kosciusko County is also included in this CHNA as it has a stand-alone emergency medicine facility which operates under the Parkview Whitley Hospital license (Figure 2).

Figure 2. Counties with Parkview Hospitals

DEMOGRAPHICS

The following section presents the demographic profile of the Parkview Health service area, which includes Allen, DeKalb, Huntington, Kosciusko, LaGrange, Noble, Wabash and Whitley Counties. Demographics can impact a community’s health concerns, as needs can be related to race/ethnicity, age, gender, and socioeconomic groups. As these groups might have unique cultural/ethnic needs or practices, intervention efforts need to be varied and responsive to differences. The U.S. Census Bureau was used as the main source of demographic data.

Population

The eight-county Parkview Health service area comprises about 10 percent of the total population in Indiana (Table 1). Based on population density, only Allen County is considered urban. The rest of the counties are considered either mixed rural/urban or rural (*Rural Indiana Stats | Geographic Classifications*, n.d.).

Table 1. Population

	Parkview Health Service Area	Indiana	United States
Population	686,494	6,696,893	326,569,308

Source: U.S. Census Bureau (American Community Survey 2016-2020 five-year averages)

As shown in Table 2, Allen County has the largest population in the service area (375,520) followed by Kosciusko County (79,156). While Allen, DeKalb, Kosciusko, LaGrange, Noble and Whitley Counties all experienced population growth between 2017 and 2020, Huntington and Wabash both experienced a slight population decline.

Table 2. Population in Parkview Counties, 2017 and 2020

Year	Allen	DeKalb	Huntington	Kosciusko	LaGrange	Noble	Wabash	Whitley
2020	375,520	43,193	36,351	79,156	39,537	47,640	31,198	33,899
2017	367,747	42,524	36,520	78,720	38,720	47,421	31,848	33,481

Source: U.S. Census Bureau (American Community Survey 2013-2017 and 2016-2020 five-year averages)

Age

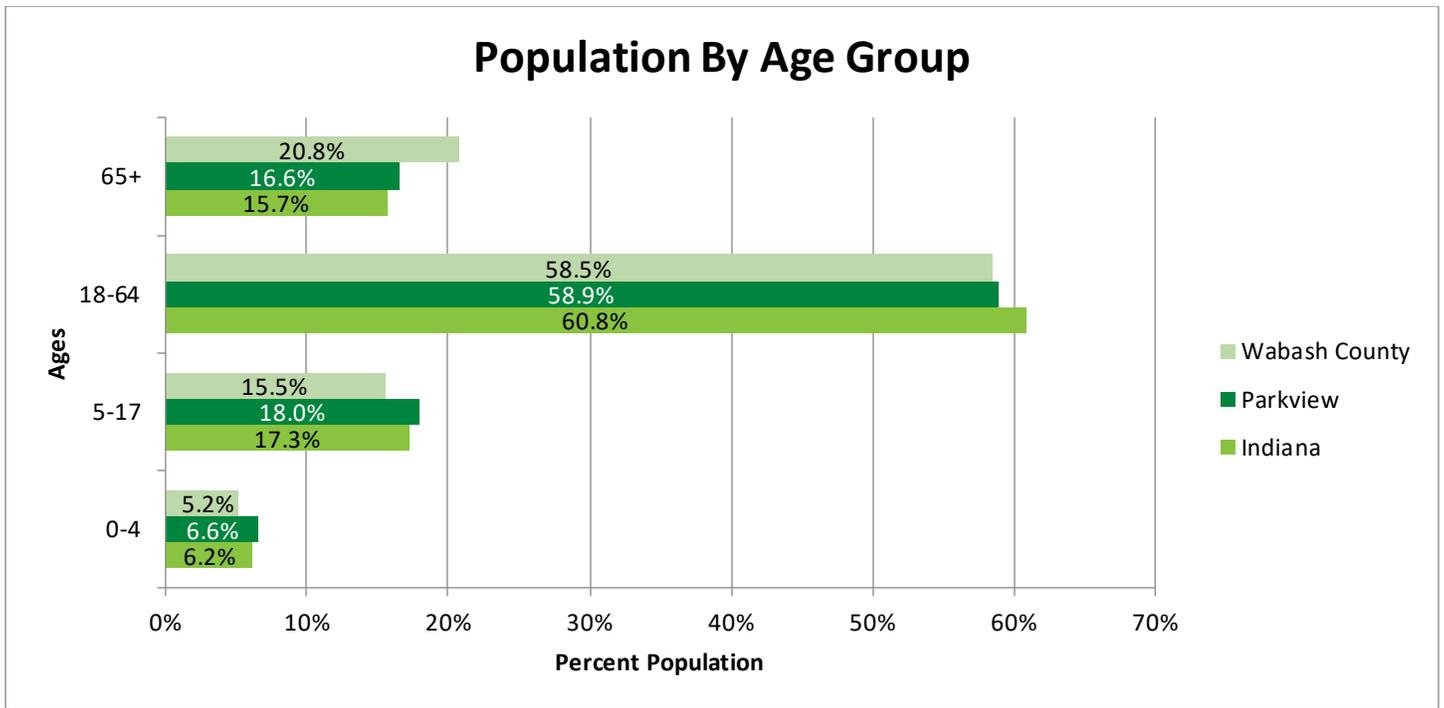

The median age for the Parkview Health service area increased from 36.9 years in 2017 to 37.3 years in 2020. The median age ranges from 31.8 years in LaGrange County to 42.5 years in Wabash County (Table 3). The eight-county Parkview Health service area has a population age breakdown comparable to the rest of Indiana. About 60 percent of the population belongs to the 18–64-year-old age group and only seven percent is within the 0- to 4-year-old age group (Figure 3).

Table 3. Median Age in Years

Year	Allen	DeKalb	Huntington	Kosciusko	LaGrange	Noble	Wabash	Whitley	Parkview	IN
2020	36.0	38.5	41.4	38.9	31.8	38.9	42.5	41.8	37.3	37.8
2017	35.7	39.1	40.3	38.0	31.5	38.5	42.0	41.0	36.9	37.5

Source: U.S. Census Bureau (American Community Survey 2013-2017 and 2016-2020 five-year averages)

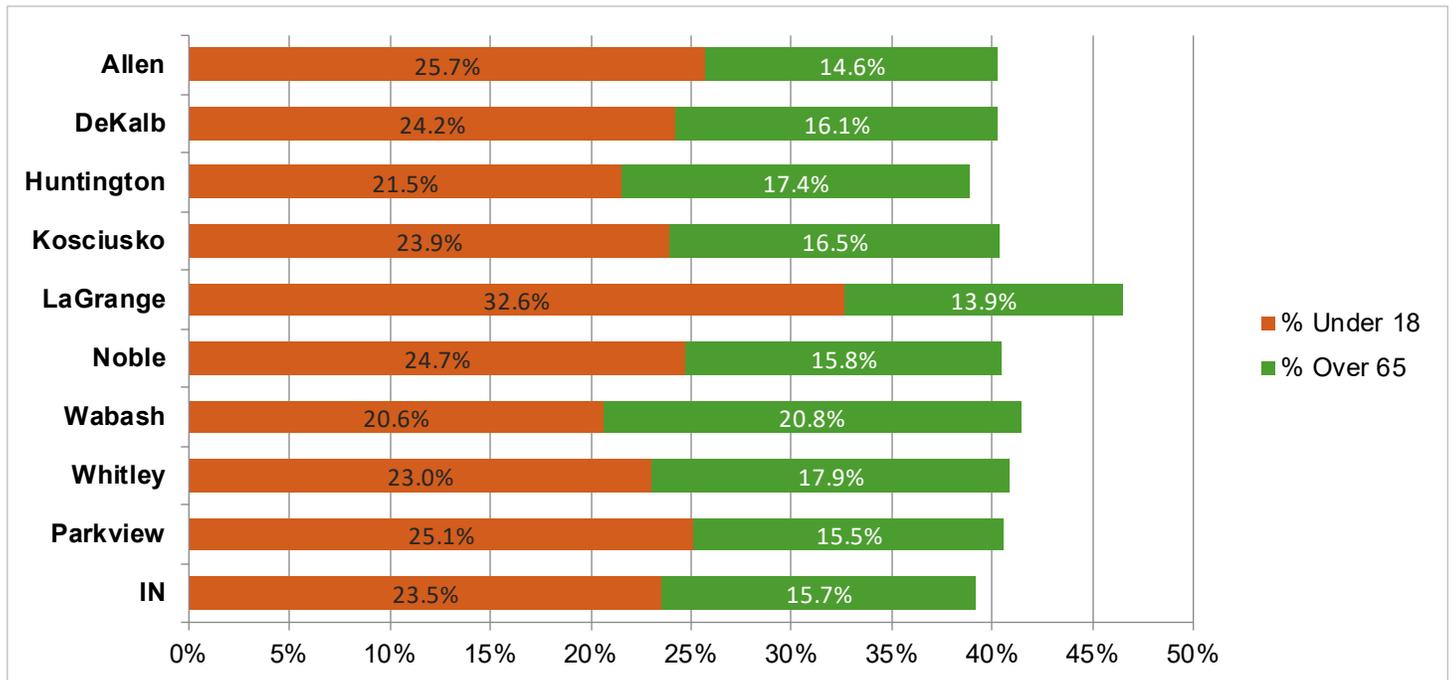

Figure 3. Population by Age Group

Source: U.S. Census Bureau (American Community Survey 2016-2020 Five-year Averages)

Because different age groups can require distinct levels and types of care, strategies for improving community health outcomes should incorporate the needs of each age cohort. The percentage of the population under 18 years is between 20 percent and 26 percent for the eight counties in the Parkview Health region except in LaGrange County, where nearly a third is under 18 years (Figure 4). At the other end of the age spectrum are individuals 65 years and older. Figure 4 demonstrates that the 65 and older population is below 20 percent for all but Wabash County (20.8%). Accessible and adequate senior services can allow the senior population to remain in their household and maintain their quality of life.

Figure 4. Child and Senior Population

Source: U.S. Census Bureau (American Community Survey 2016-2020 Five-year Averages)

Race and Ethnicity

As illustrated by Table 4 and Figure 5, the racial composition of the eight-county Parkview Health region is predominantly non-Hispanic White, which is similar to the rest of Indiana. However, racial diversity has increased in the Parkview Health service area since 2017, due mostly to increases in Hispanic or Latino and other races and ethnicities in all counties, except for DeKalb County where the percent of population comprising 'Other Race or Ethnicity' decreased by 0.2 percent, but the Black or African American population increased by 0.2 percent. Across counties, Allen County has the highest percentage of population comprised of Black or African American individuals (11.3%) and Other Race or Ethnicities (8.1%), and Noble County has the highest Hispanic population (10.4%).

As compared to the rest of the state, the eight-county Parkview Health service area had a lower percentage of Hispanic or Latino and Black or African American individuals and a higher percentage of White and individuals of other races or ethnicities.

One component to diversity that is not reflected in the previous table is the large Amish population present in Northeast Indiana. The 2010 U.S. Religion Census showed that more than 14,000 Amish lived in LaGrange County alone and comprised 37.1 percent of the total LaGrange County population, which makes it the second largest county (by population) of Amish in the United States. Although there is an

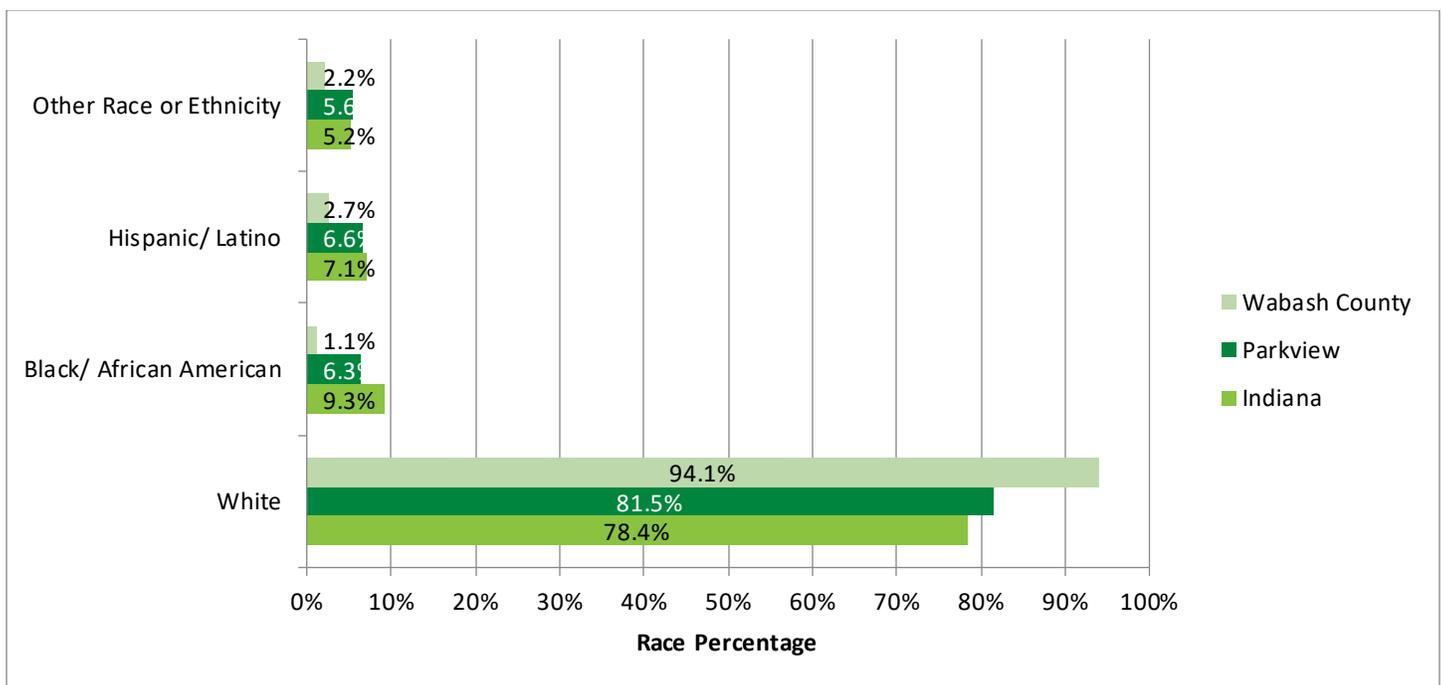

Amish population in other counties, as well, Amish individuals are less likely to live in the urban areas (e.g., less than 1% of the 2010 population of Allen County was Amish).

Table 4. Percent of Population by Race and Ethnicity

Race and Ethnicity	Year	Allen	DeKalb	Huntington	Kosciusko	LaGrange	Noble	Wabash	Whitley	Parkview	IN
White	2020	73.2%	95.0%	94.4%	87.5%	94.0%	86.8%	94.1%	94.7%	81.5%	78.4%
	2017	74.6%	95.1%	95.2%	88.6%	94.4%	87.6%	94.5%	95.7%	82.6%	79.8%

Social Determinants of Health

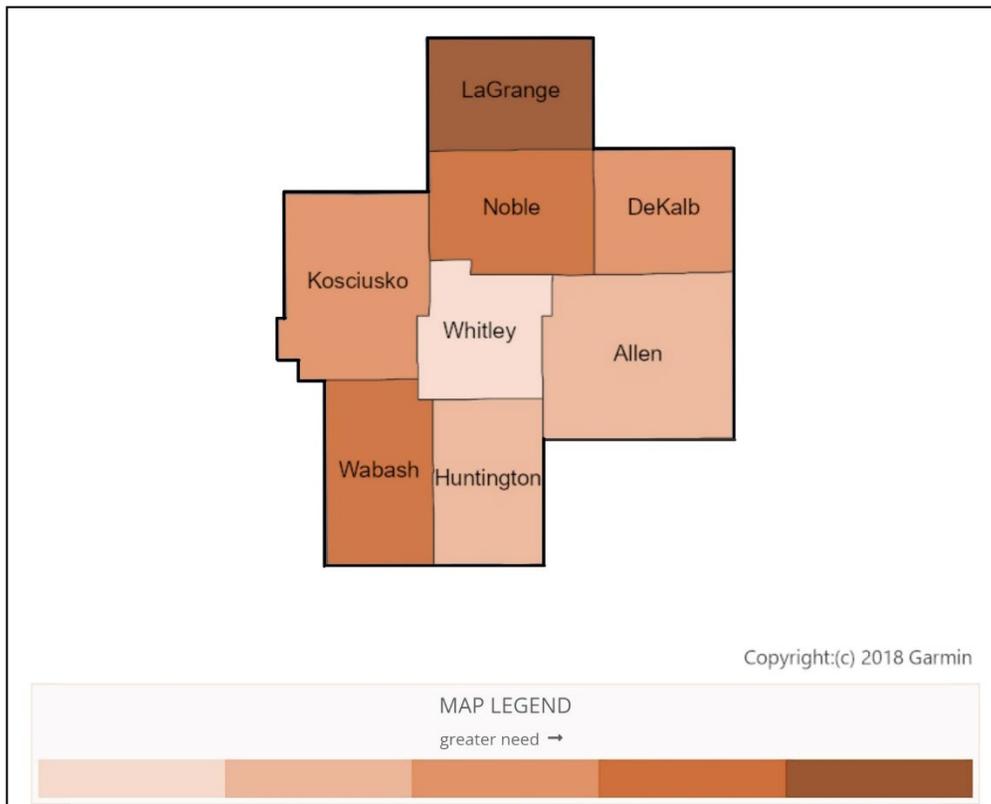

Social determinants of health (SDOH) are the “conditions in which people are born, grow, live, work and age that contribute to health outcomes” (*Social Determinants Resources*, n.d.). These indicators affect a wide range of health risks and outcomes (Artiga & Hinton, 2019). SDOH include factors like socioeconomic status, education, neighborhood, physical environment, employment, and social support networks, as well as access to healthcare. The effect of individual social determinants of health is difficult to discern as these factors are interdependent and interconnected. Evidence shows that poverty limits access to food, safe neighborhoods, and high-quality education. Also, poorer

neighborhoods are significantly impacted by food insecurities and lower educational status, which can lead to poor health outcomes and reduced life expectancies.

In the United States, racial and ethnic minority groups continue to experience higher mortality rates and increased incidence of a wide range of illnesses compared to their white counterparts. These health disparities are inextricably linked to inequities in the following social determinants of health: social and community context (discrimination and racism), healthcare access, physical environments and neighborhoods, workplace conditions, education, and income gaps. Health equity is accomplished when all individuals have a fair and just opportunity to attain their highest level of health (*Health Equity* | CDC, 2022). Efforts toward health equity require economic, social, and other barriers to health be identified and addressed.

The Health Equity Index developed by Conduent Healthy Communities identifies geographic areas at highest risk for experiencing health inequities correlated with preventable hospitalizations and premature death based on validated indicators related to income, employment, education, and household environment. Counties were given an index value ranging from 0 (indicating lowest need) to 100 (indicating highest need). Counties in the Parkview Health service area were then ranked from 1 (low need) to 5 (high need) based on their relative index value. As shown in Figure 6 and Table 5, LaGrange County had the highest level of socioeconomic need.

Figure 6. Health Equity Index County Map

Measurement period: 2021. Data Source: Conduent Healthy Communities

Table 5. Health Equity Index Scores and Rank by County

County	Index	Rank
LaGrange	71.7	5
Noble	51.9	4
Wabash	51.5	4
Kosciusko	43.8	3
DeKalb	41.5	3
Allen	37.9	2
Huntington	32.6	2
Whitley	25.9	1

Measurement period: 2021. Source: Conduent Healthy Communities

Median Household Income

The median household income in the eight-county Parkview Health service area ranges from \$54,286 in Huntington County to \$69,331 in LaGrange County (Table 6). Since 2017, the median household income across counties has increased by 15 percent overall, with the smallest increase in Huntington County (8.4%) and the largest increase LaGrange County (18.8%).

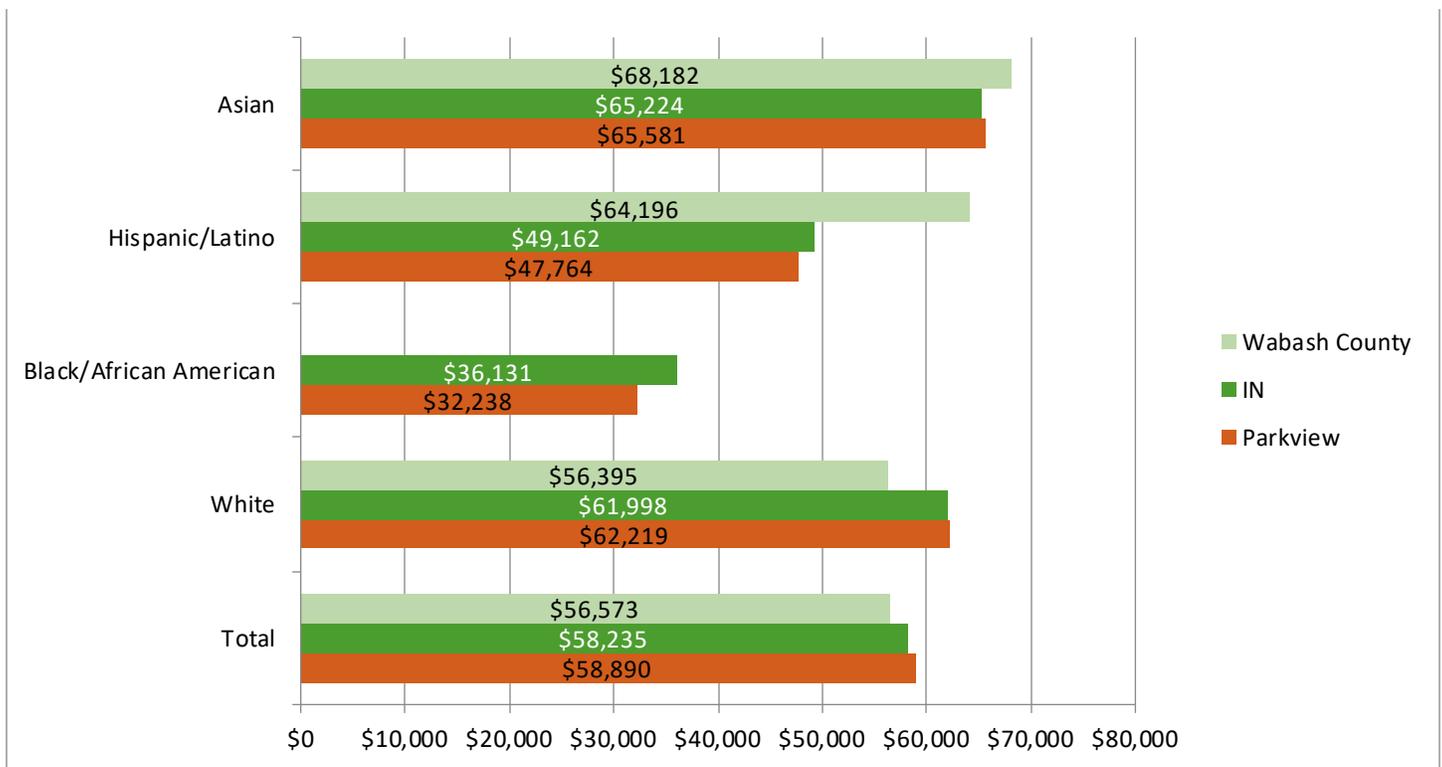

Table 6. Median Household Income in Dollars

Year	Allen	DeKalb	Huntington	Kosciusko	LaGrange	Noble	Wabash	Whitley	Parkview	IN
2020	57,104	58,415	54,286	62,789	69,331	58,947	56,573	64,992	58,890	58,235
2017	51,091	51,374	50,063	57,190	58,336	52,393	49,052	57,041	52,466	52,182

Source: U.S. Census Bureau (American Community Survey 2013-2017 and 2016-2020 five-year averages)

Racial disparities in median household income are evident in Figure 7. Median Household Income by Race and Ethnicity. The median household income for Black and African American households in the Parkview Health service area is much lower than for White households in this area and is lower than the median household income for Black and African American households in Indiana.

Figure 7. Median Household Income by Race and Ethnicity

Notes: Median household income not available for Black/African American population. Source: U.S. Census Bureau (American Community Survey 2016-2020 Five-year Averages)

Poverty

The percentage of the population living below poverty in the Parkview Health service area (11.1%) is lower than the state percentage (12.9%). Although the percentage of the population below poverty ranges from a low of 6.0 percent in LaGrange County to a high of 12.6 percent in Allen County (Table 7), each of the counties has a poverty rate that is below that of the state of Indiana.

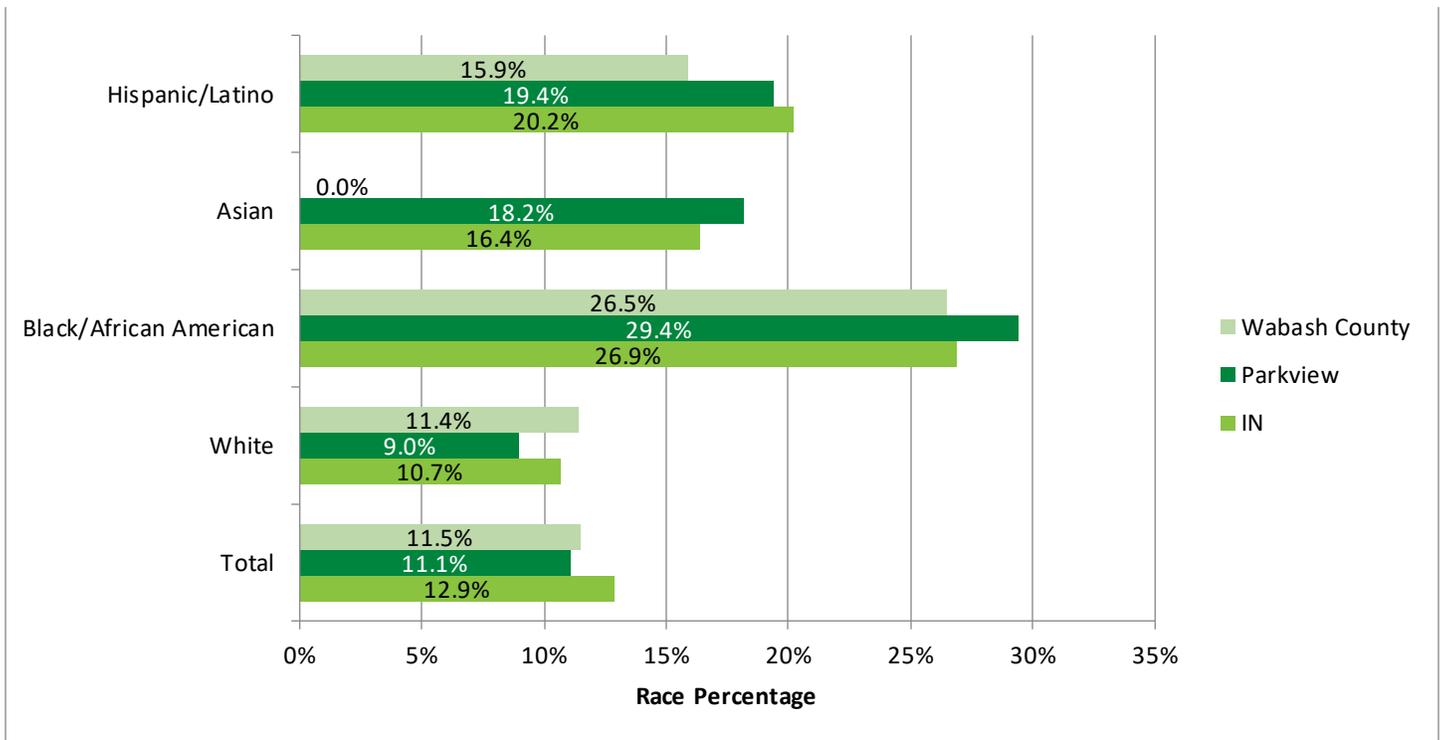

Regarding the percentage of the population living below the poverty level, racial disparities are evident in both the Parkview Health service area and the state of Indiana. As compared to the poverty rate for the White population in the Parkview Health service area (9.0%), Black and African American populations are almost three times as likely to be living below poverty level (29.4%), and Hispanic and Latino and Asian populations are almost twice as likely to be living below poverty level (19.4% and 18.2%, respectively). As compared to state averages by race and ethnicity, the poverty rates for the White population, and the Hispanic and Latino populations in the Parkview Health service area are lower than their respective Indiana averages. In contrast, the poverty rates for Black and African American populations and Asian populations in the Parkview Health service area are higher than their respective Indiana averages. See Figure 8.

Table 7. Percentage of Population Below Poverty Line

Year	Allen	DeKalb	Huntington	Kosciusko	LaGrange	Noble	Wabash	Whitley	Parkview	IN
2020	12.6%	11.0%	11.2%	9.3%	6.0%	7.8%	11.5%	9.6%	11.1%	12.9%
2017	14.7%	12.5%	11.6%	11.2%	9.1%	9.3%	13.3%	9.5%	13.0%	14.6%

Source: U.S. Census Bureau (American Community Survey 2013-2017 and 2016-2020 Five-year Averages)

Figure 8. Population Below the Federal Poverty Level by Race and Ethnicity

Source: U.S. Census Bureau (American Community Survey 2016-2020 Five-year Averages)

Unemployment

The unemployment rate is another indicator of the social and economic status of a geographic area or population. Unemployment in the Parkview Health service area is lower than the state overall. Unemployment ranges from 2.4 percent in Huntington County to 5.0 percent in Allen County (Table 8), which is only slightly higher than the rate overall for the eight-county Parkview Health service area (4.4%) and the state of Indiana (4.7%).

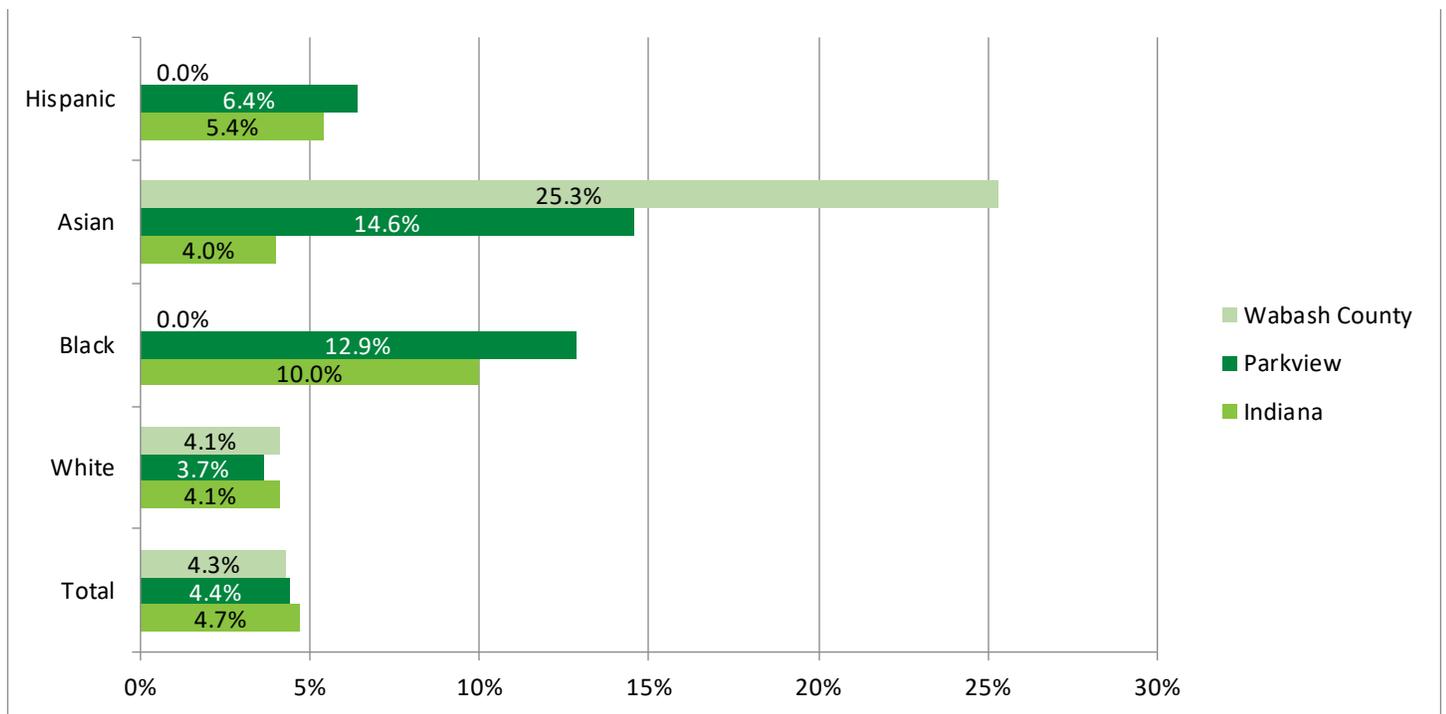

Like the disparities present in income and poverty level, racial disparities are also seen with unemployment rates. The Black and African American, Hispanic, and Asian populations in the Parkview Health service area have higher unemployment rates than their corresponding unemployment rates for the state (Figure 9).

Table 8. Percentage of Population Unemployed

Year	Allen	DeKalb	Huntington	Kosciusko	LaGrange	Noble	Wabash	Whitley	Parkview	IN
2020	5.0%	3.8%	2.4%	3.6%	3.4%	4.0%	4.3%	4.4%	4.4%	4.7%
2017	6.3%	4.6%	3.9%	4.6%	2.9%	5.7%	5.5%	3.6%	5.5%	6.1%

Source: U.S. Census Bureau (American Community Survey 2013-2017 and 2016-2020 five-year averages)

Figure 9. Unemployment Rate by Race/Ethnicity

Source: U.S. Census Bureau (American Community Survey 2016-2020 Five-year Averages)

Education

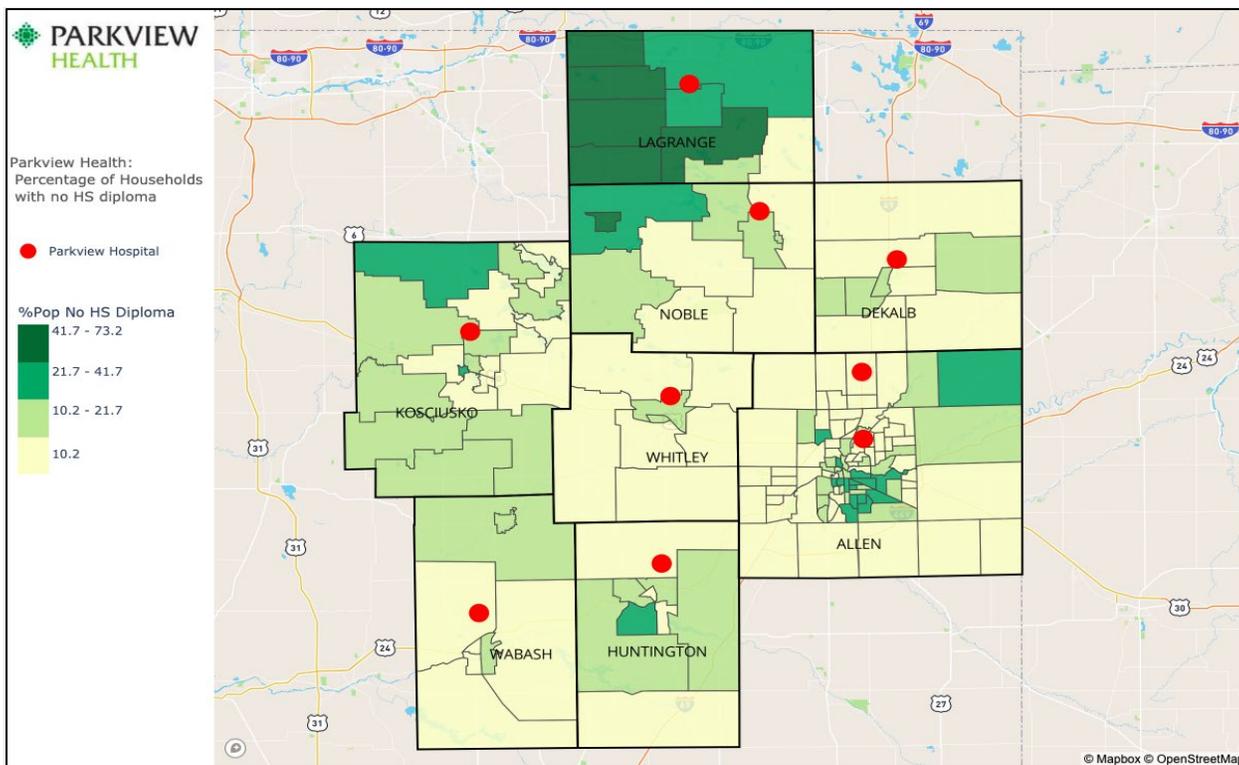

Education is related to several other social measures, including income, poverty, and unemployment. Limited education can be a key marker for identifying populations who may have health service needs. The percentage of the population without a high school diploma or equivalent is shown in Table 9. LaGrange County has the highest proportion of individuals without a high school diploma (38.9%) and the highest percentage of households with no high school diploma (Figure 10), which is due to the concentration of Amish communities in the county. Individuals in Amish communities have other training or economic options outside of a high school education. Noble and Kosciusko Counties have the second and third highest rate of individuals without a high school diploma, which may also be reflective of a relatively high proportion of Amish individuals in these counties (each has a population 1,000-4,999 Amish individuals).

Table 9. Population Without High School Diploma

Year	Allen	DeKalb	Huntington	Kosciusko	LaGrange	Noble	Wabash	Whitley	Parkview	IN
2020	10.1%	9.0%	8.1%	13.2%	38.9%	16.1%	10.3%	8.6%	12.3%	10.7%
2017	10.6%	10.4%	9.5%	15.2%	36.7%	15.0%	11.3%	8.9%	12.8%	11.7%

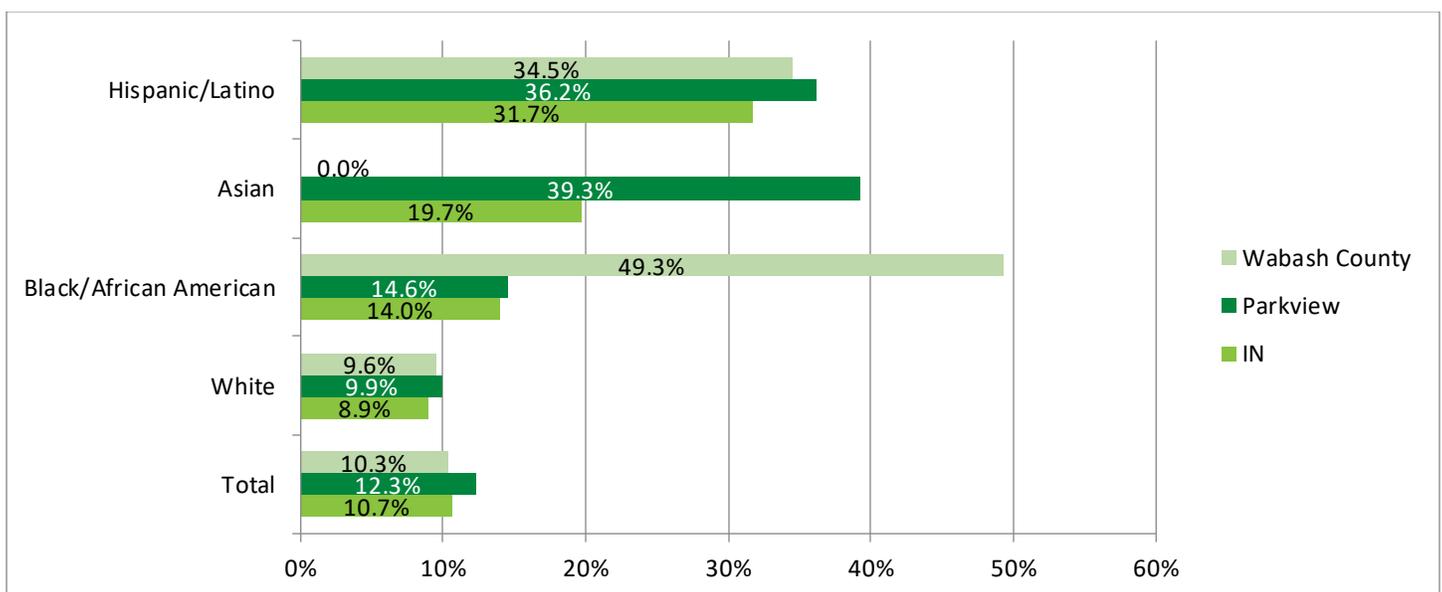

Source: U.S. Census Bureau (American Community Survey 2013-2017 and 2016-2020 five-year averages)

Figure 10. Percent of Households With No High School Diploma

Overall, the Parkview Health service area has a slightly higher percentage of population without a high school diploma compared to the Indiana rate. Additionally, racial disparities are evident in educational attainment (Figure 11). Notably, 36.2 percent of the Hispanic/Latino population and 39.3 percent of the Asian population is without a high school diploma. With these racial minorities already at a disadvantage in terms of income and poverty, this added inequity further impacts their health outcomes.

Figure 11. Population Without a High School Diploma by Race/Ethnicity

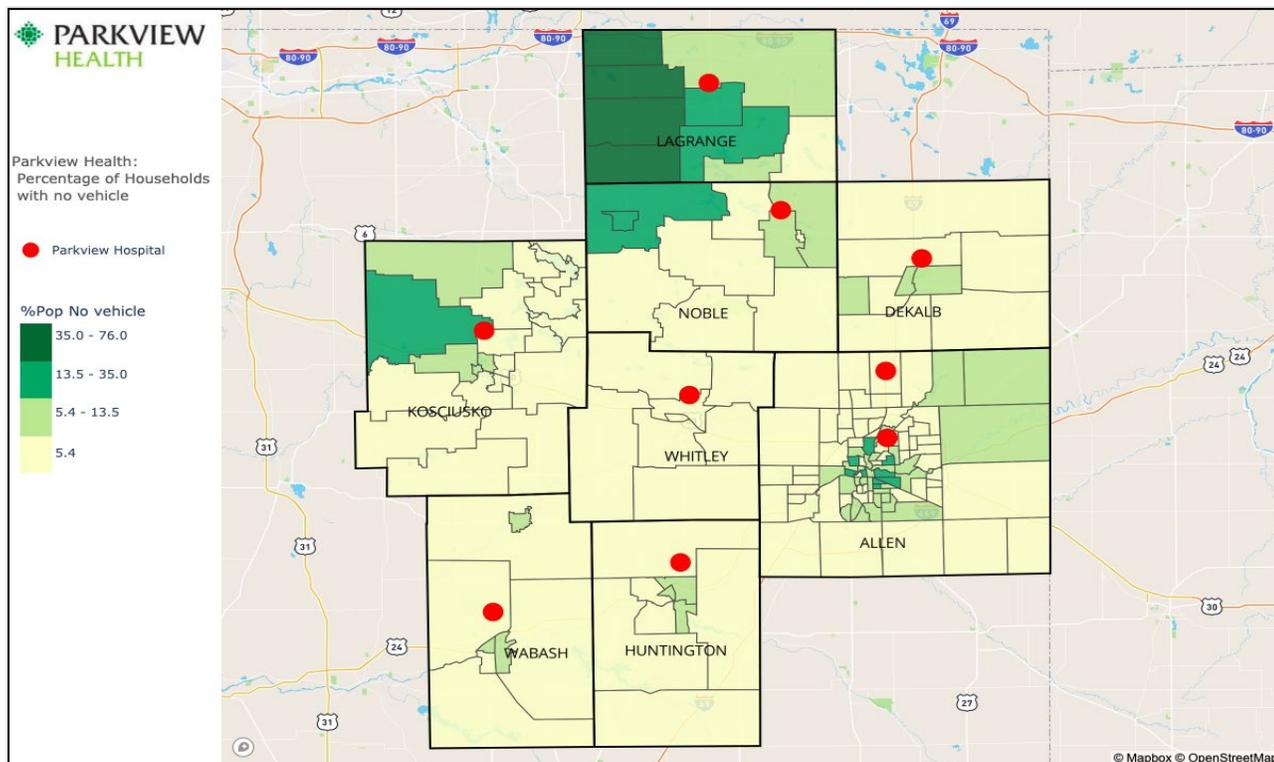

Transportation

Availability of transportation is an important factor for individual and community health, especially in rural or mixed urban/rural areas (i.e., seven of the eight Parkview Health service area counties), where having a personal vehicle is important because of lower population density for shared ridership and smaller tax base for public transportation systems.

As shown in Figure 12 below, most counties have few households (i.e., $\leq 5.4\%$ households) without a vehicle, except for LaGrange County. The high percentage of houses with no vehicle in LaGrange County (i.e., 35 – 76% for the years 2016-2020) is likely due to the large Amish population in LaGrange County, who typically rely upon on horse carriages and wagons for their transport purposes. A slightly higher percentage of homes without a vehicle is also seen in the northeast part of Allen County.

Figure 12. Households With No Vehicle

Source: U.S. Census Bureau (American Community Survey 2016-2020 Five-year Averages)

Food Access

Food security includes accessibility and affordability of food. In a food insecure environment, children and adults may experience adverse health outcomes, such as an increased risk of depression, cardiovascular disease, and peripheral arterial disease in older populations (Laraia, 2013). Across the eight-county service area, approximately one in ten individuals was food insecure in 2020, ranging from a low of 9.2 percent in LaGrange County to a high of 13.3 percent in Allen County. Access to healthy, nutritious food – including fruits and vegetables – is important for a healthy lifestyle. Additionally, Allen County had the highest percentage (9.8%) both low-income and with low access to a grocery store (Table 10).

Table 10. Food Insecurity and Limited Access to Healthy Food

Measure	Year	Allen	DeKalb	Huntington	Kosciusko	LaGrange	Noble	Wabash	Whitley	Parkview	IN
Food Insecurity*	2020	13.3%	11.0%	11.4%	10.0%	9.2%	9.4%	11.9%	10.1%	12.0%	13.3%

Neighborhood and Built Environment

The built environment is the space in which we live, work, learn, and play and includes workplaces and housing, business and schools, landscapes, and infrastructure. The neighborhoods in which people live and the built environment influence the public’s health, particularly in relation to safety and chronic diseases. Exposure to violent crime, access to locations for physical activity and access to broadband internet connection are just a few measures related to community safety and health.

Violent Crime

High crime rates can lead to mental distress, a lower quality of life, an increase in negative health outcomes, premature death or nonfatal injuries (Margolin et al., 2010). An example of the negative effect of a high crime rate in the neighborhood is a reluctance of residents to walk outdoors or permit their children to play or bike outside which can lead to obesity and related health issues. Violent crime rates in 2016 varied widely across the eight-county Parkview Health service area. The violent crime rate was highest in Allen County at 296 offenses per 100,000 population and lowest in Huntington County at 33 per 100,000 population in 2016 (Table 11).

Table 11. Number of Reported Violent Crime Offenses per 100,000 Population

Year	Allen	DeKalb	Huntington	Kosciusko	LaGrange	Noble	Wabash	Whitley	IN
2016	296	117	33	159	103	158	51	.	385
2014	283	123	126	253	75	73	60	.	356

Source: County Health Rankings and Roadmaps

Exercise Opportunities

As shown in Table 12, the percent of the population that has adequate access to locations for physical activity decreased in several counties in the Parkview service area from 2017-2020. DeKalb, Kosciusko, LaGrange, Noble, Wabash and Whitley counties all have lower access to exercise opportunities compared to the state of Indiana.

Table 12. Percent of Population that has Access to Locations for Physical Activity

Year	Allen	DeKalb	Huntington	Kosciusko	LaGrange	Noble	Wabash	Whitley	Parkview	IN
2020	78.2%	59.2%	76.5%	65.4%	24.4%	63.8%	68.6%	58.0%	69.9%	75.2%
2017	81.8%	69.4%	82.4%	70.2%	32.0%	57.8%	57.2%	63.3%	73.1%	74.8%

Source: County Health Rankings and Roadmaps

Broadband Access

More recently, broadband access has emerged as a social determinant of health. Digital equity is necessary to achieve health equity; employment opportunities, access to education, healthcare access, and social connectedness are all reliant on broadband internet connection to a degree. Rural areas and low-income urban areas are most likely to be affected by limited broadband access. The percentage of households with broadband internet connection increased in several counties within Parkview Health's service area from 2015-2019 to 2016-2020 (Table 13). However, DeKalb, Huntington, LaGrange, Noble and Wabash counties had a lower percentage of connected households compared to the state of Indiana in 2016-2020.

Table 13. Percent of Households With Broadband Internet Connection

Year	Allen	DeKalb	Huntington	Kosciusko	LaGrange	Noble	Wabash	Whitley	Parkview	IN
2020	86.7%	80.5%	78.8%	83.0%	62.3%	80.7%	79.8%	84.0%	83.2%	83.2%
2019	84.2%	78.1%	78.8%	79.8%	58.8%	79.7%	74.7%	81.1%	81.4%	80.1%

Source: County Health Rankings and Roadmaps (Five-year Averages)

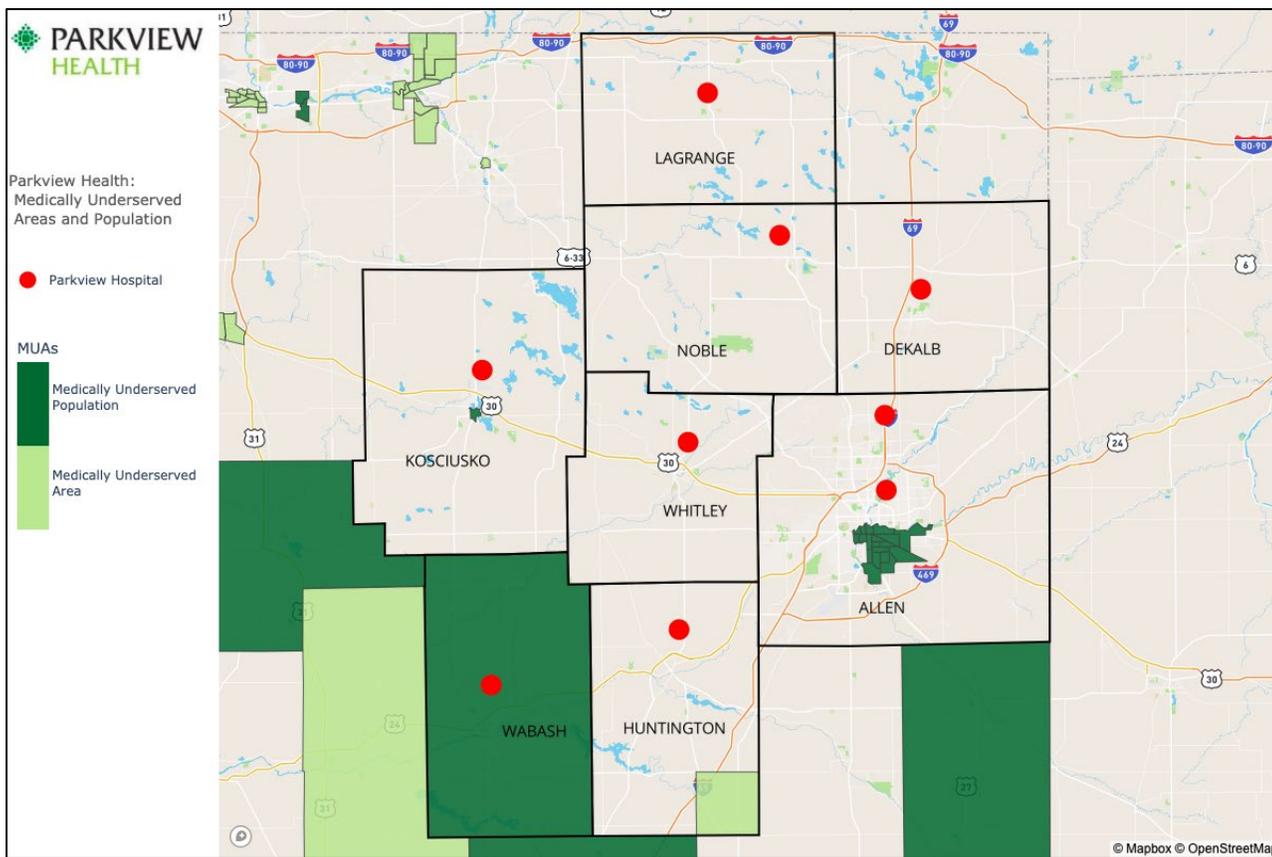

Access to Healthcare

Access to healthcare is critical to receiving necessary care in a timely manner. Indicators for access to healthcare include identifying medically underserved geographic areas and populations and rates of uninsured individuals.

Medically Underserved Areas and Populations

Medically underserved areas (MUA) and medically underserved populations identify geographic areas and populations with access barriers to primary care services. Using Health Resources & Services Administration 2022 data, medically underserved areas (Figure 13, light green) were mainly identified in Huntington County and in the southwest area bordering the Parkview Health primary service area. Several medically underserved populations were identified (Figure 13, dark green) mainly in Wabash County, Allen County, and in the south/southwest areas bordering the eight-county region.

Figure 13. Medically Underserved Areas and Populations

Source: Health Resources & Services Administration, 2022

Health Insurance

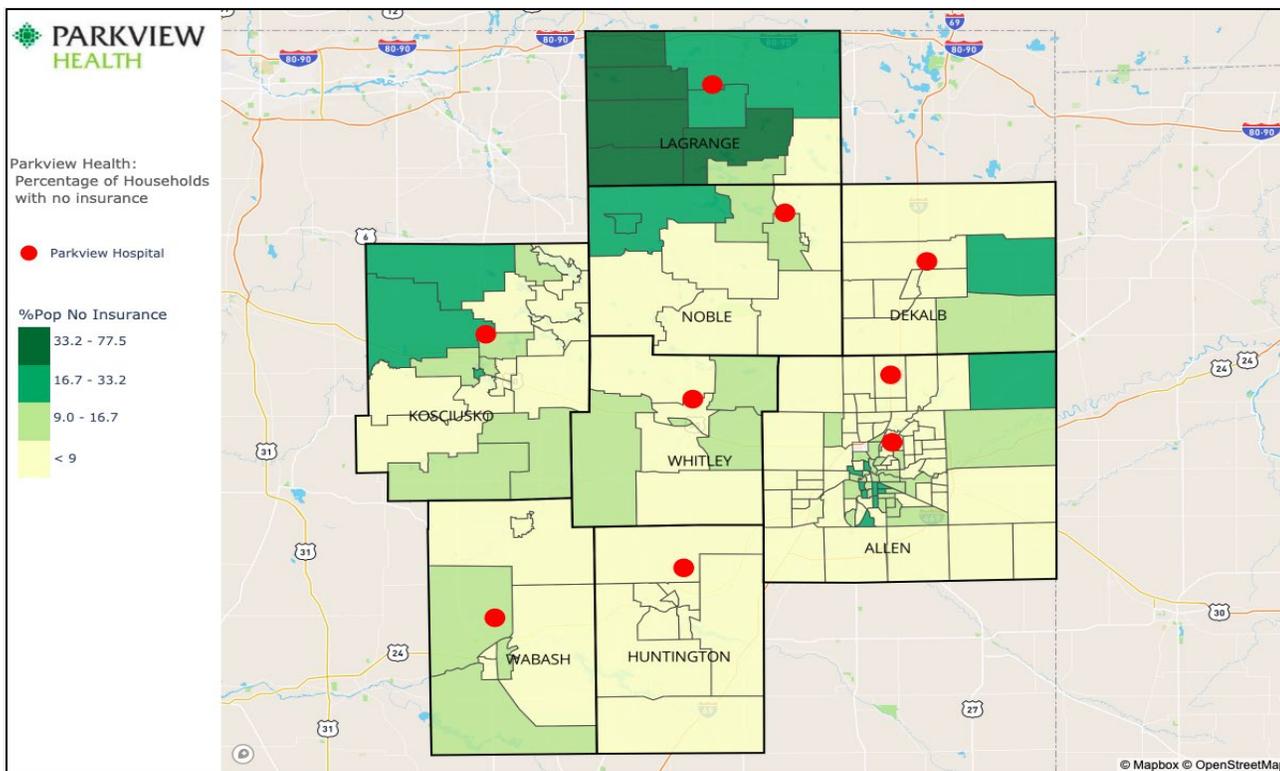

The percentage of the population without health insurance ranged from 7.1 percent in DeKalb County to 42.6 percent in LaGrange County, with 57.9 percent of children in LaGrange County without health insurance (Table 14). Individuals living in Amish communities are less likely to have traditional health insurance policies and instead rely upon their own community resources, which accounts for the high rate of uninsured individuals in LaGrange County. The map in Figure 14 illustrates the percentage of households without health insurance at the census tract level, highlighting areas in several counties with more than 16.7 percent of households having no health insurance.

Table 14. Percent of Population Without Health Insurance

	Year	Allen	DeKalb	Huntington	Kosciusko	LaGrange	Noble	Wabash	Whitley	Parkview	IN

CRITICAL HEALTH CONCERNS

The current Community Health Needs Assessment was aimed at identifying critical health concerns for the Parkview Health service area. As such, both primary and secondary data were collected and synthesized to understand current health concerns. Health indicators for the Parkview Health service area were identified using secondary data from the Healthy Communities Institute (HCI) dashboard. Primary data were collected to identify community perceptions of health concerns and related service needs using survey methods. Healthcare and social services providers (e.g., physicians, nurses, social workers, etc.) and community residents throughout eight Parkview Health service area counties were invited to participate. These data sources are described in the following sections.

Secondary Data: County Level Health Indicators

The U.S. Census Bureau American Community Survey and the Parkview Health Community Dashboard developed by HCI were used as the main sources of secondary data. The dashboard includes data from the Indiana Hospital Association as well as the Indiana State Department of Health, National Cancer Institute, Centers for Disease Control and Prevention (CDC), Centers for Medicaid and Medicare Services, the National Center for HIV/AIDS, Viral Hepatitis, STD and TB Prevention, Institute for Health Metrics and Evaluation, County Health Rankings Roadmaps, U.S. Census Bureau, U.S. Department of Agriculture, and other sources. Additional relevant data for counties in the Parkview Health region was obtained from the Health Resources & Services Administration and the Association of Religion Data Archives, Mental Health America, CDC PLACES, CDC Underlying Cause of Death database, CDC Chronic Kidney Disease Surveillance System, CDC National Environmental Public Health Tracking Network, American Cancer Society, Indiana Youth Institute, and Alzheimer's Association.

The Parkview Health Community Dashboard developed by Healthy Communities Institute (HCI) was used to identify county indicators performing in the bottom quartile of U.S. Counties based on a sample of over 3,000 counties and county equivalents (Figure 15). If a comparison to U.S. counties was not available for an indicator, then a regional comparison to the Indiana state value was used. If neither a comparison to U.S. counties nor the Indiana region was available, then the indicator was not evaluated for performance. Clinical care ranking and physical environment ranking were the only indicators not available in the 2022 dashboard data compared to previous reports.

Figure 15. Example Snapshot from HCI Dashboard

Based upon review of 200+ indicators, Table 15. County Health Indicators Performing in the Bottom Quartile of U.S. Counties describes the health outcomes and behaviors for which any of the eight counties in the Parkview Health service area was in the lowest performing quartile of U.S. counties or was significantly worse than the Indiana region.

Forty-seven (47) HCI health indicators were either in the bottom performing quartile of U.S. counties or significantly worse compared to the Indiana region. Some health indicators relate to the same health condition (e.g., adults 20+ with diabetes and age-adjusted death rate for diabetes). If at least one indicator for a related health issue was in the bottom performing quartile or significantly worse than the state region, then that health issue was considered as a potential community health concern for Parkview Health. The 47 indicators were categorized into 16 general health issues, as shown in Table 15, County Health Indicators Performing in the Bottom Quartile of U.S. Counties.

Table 16 and Table 17 list the **social indicators (21) and access indicators (33)**, respectively, for which counties in the Parkview Health service area are in the bottom-performing quartile compared to U.S. counties or significantly worse than the Indiana region.

Primary Data: Survey Methods & Results

Parkview service area community member and provider input was gathered via multiple recruitment and data collection methods (Figure 16): 1) e-mail to healthcare and social service providers with an embedded online survey link; 2) mailed paper and e-mailed online surveys to community members; 3) paper surveys distributed to individuals, clinics or organizations serving Hispanic, Amish, or People of Burma populations; 4) in-person recruitment at locations providing services to low-income populations throughout the eight counties and 5) press release and social media notifications with a survey link. The relevant data collection methods are described below. Descriptive statistics were calculated for all survey items. A summary of responses by community, special populations, and providers for each county is provided for health concerns (Table 18) and service needs (Table 19).

Figure 16. Multi-Pronged Approach to Primary Data Collection

Community Survey

A survey (Appendix B), conducted from March through May 2022, was designed to collect community member perspectives of the top health issues and services needed in their local communities. A multi-pronged approach was used to obtain community input: 1) a recruitment email with an embedded survey link was sent via the Parkview patient portal to all Parkview patients with portal communication preferences indicating a willingness to receive surveys/questionnaires; 2) printed paper surveys were mailed to 2500 randomly selected households in each county (it is unknown if members of these households have ever been served by Parkview); 3) paper surveys were distributed to community health workers and locations serving Hispanic, Amish, or People of Burma populations; 4) press release and social media notifications were posted with links to the survey; and 5) in-person teams of research assistants recruited participants at various public locations, such as libraries, YMCAs, and retail stores throughout the eight-county service area (Table 20). The research team coordinated with local health departments and known contacts in each county to identify locations to survey underrepresented or vulnerable populations. Table 20 details the targeted population and location for each county.

Table 20. Community Survey Outreach

Community Location	Description
YMCA – Allen, DeKalb, Huntington, Kosciusko, Noble, Wabash, and Whitley counties	The YMCA is a non-profit, community-centered organization that provides programs and services to foster community development and help people (including underserved community members) learn, grow, and thrive.
Public Library – Allen, DeKalb, LaGrange, and Noble counties	Public libraries aim to enrich the community and encourage lifelong learning by providing services that meet the informational, educational, and recreational needs of diverse populations, such as learning job skills, finding health information, and exploring digital technologies.
Lutheran Church – Allen County	This Lutheran church serves a diverse population and supports the local community through involvement with area neighborhood associations, social services, and schools.
Pharmacy – LaGrange County	This pharmacy promotes the health and welfare of the community by providing healthcare services and health education for a predominantly Amish population.
Coffee Shop – Noble and Wabash counties	These coffee shops serve a diverse population and support community outreach at local events.
Thrift Store – Wabash County	This thrift store is a non-profit organization that supplies clothing, household items, hygiene products, and Holiday food baskets for low-income or otherwise struggling community residents.

Our data collection methods recruited a convenience sample, as such the results are subject to selection bias and reduced generalizability to the entire eight-county service region. The survey contained demographic questions (gender, race, ethnicity, age, zip code), a list of 17 health issues, and 18 service needs. Respondents indicated whether each health issue was a concern (yes/no) and the importance of each service need (1=least important, 5=most important). Service needs rated as “5 Most Important” are reported. Frequencies reported for the full sample were algorithmically weighted to account for differences in the demographic composition of survey participants compared to the demographics of each county. Figure 17 shows the number of respondents across the eight Parkview Health service area counties.

Figure 17. Community Survey Respondents by ZIP Code

Community Survey Results

The demographics of the Wabash County community survey respondents can be found in Table 21. The majority of respondents were female (61.7%), White (93.8%), and respondents 65 years and older were well-represented (45.5%). Community respondents ranked substance abuse or use as their top health concern, followed by obesity and chronic disease (Figure 18). Substance abuse services was most frequently indicated by community respondents as a top social service issue for their community, followed by mental health counseling and access to food (Figure 19).

Table 21. Sample Demographics by County and Overall

Figure 18. Top Community Health Concerns (Community Perceptions)

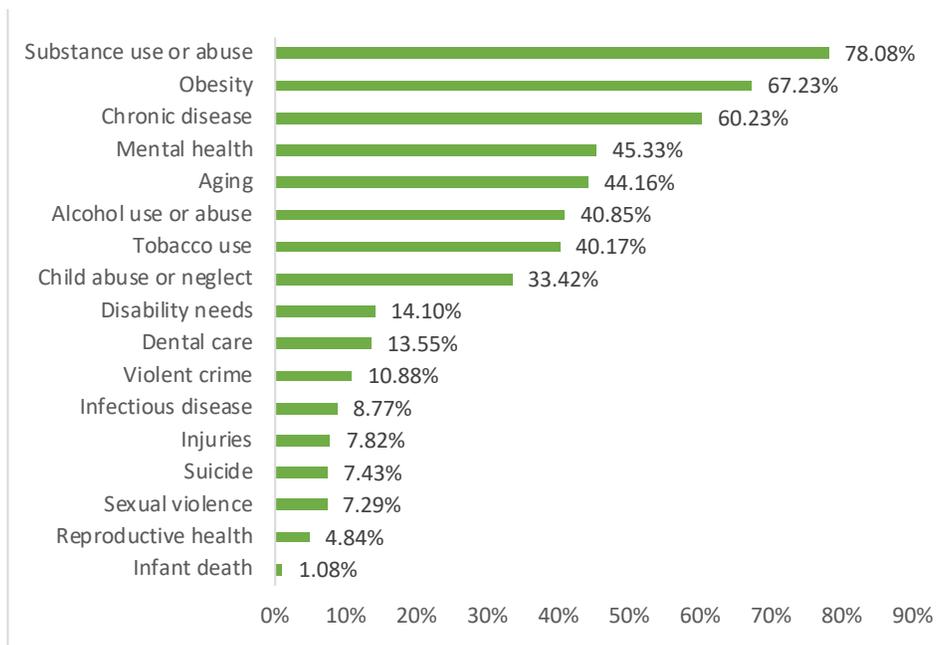

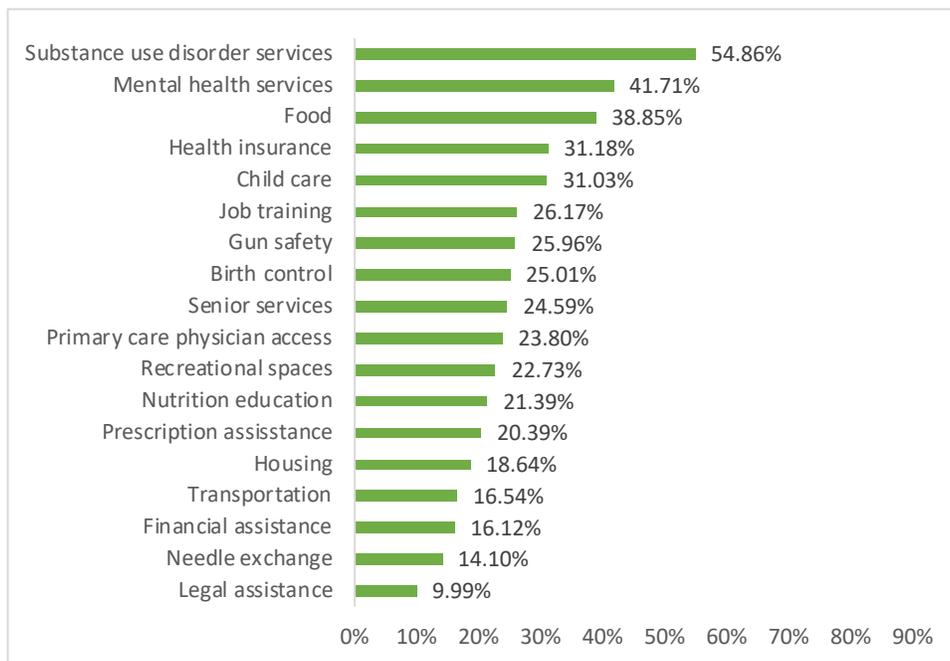

Figure 19. Top Social Service Needs (Community Perceptions)

Community Survey - Special Populations

Hispanic, Amish, and People of Burma (Myanmar) populations have been underrepresented groups in past CHNA surveys. To increase survey response for these populations, surveys were: 1) translated into Spanish and Burmese; and 2) individuals known to these groups recruited participants and distributed surveys. Survey results for these special populations are presented in the 2022 CHNA Parkview Health Systemwide Report.

Provider Survey

An online survey of health and social service providers in the Parkview service area was conducted to assess perceptions of community health concerns and service needs. Providers were invited to participate during a Parkview provider quarterly meeting (February 2022) and via an email with a link to the survey sent to Parkview employed and non-Parkview employed healthcare and community service providers throughout the eight-county service area. The survey used in the previous health needs assessment was updated by adding COVID-19 to the list of infectious diseases. The survey covered aspects of the provider's work including the setting in which they practiced, the duration of time in practice in the region/county, and their perception of the chief public health concerns, barriers to care, and awareness of available resources in their communities. We did not collect the workplace organization name to protect the privacy of the respondents.

A total of 396 providers responded to the survey. Most respondents practiced in Allen County (39.7%), followed by Huntington County (19.2%) (Table 22). Respondents were primarily female (68.9%) and White (91.7%). Providers were asked how long they had practiced in their county in the Parkview Health service area. About one-third (30.6%) of the respondents had been in practice for more than 20 years. This suggests that a good proportion of the responding providers had spent most of their careers in the county they specified, thus were more likely to be aware of the community's needs and concerns. About a quarter (24.5%) of providers were relatively new, with one to five years of practice in this region.

Overall, the most frequent provider type was physician (23.2%) and the most frequent work setting was outpatient clinic (primary care: 19.9%; specialized care: 18.9%) (Table 23).

Providers perceived that the top three greatest community health needs were mental health, obesity, chronic disease and aging (Figure 20).

Figure 20. Community Health Issues of Greatest Concern (Provider Perceptions)

The most important service needs identified by providers in Wabash County included mental health counseling, substance abuse services, senior services and financial assistance (Figure 21).

Figure 21. Greatest Social Service Needs (Provider Perceptions)

Data Considerations and Limitations

The HSIR team and Parkview Health employed innovative data collection methods to gather survey data from all counties and vulnerable or under-represented groups. As well, a wide range of existing secondary data sources were used. However, several limitations of the data should be considered when

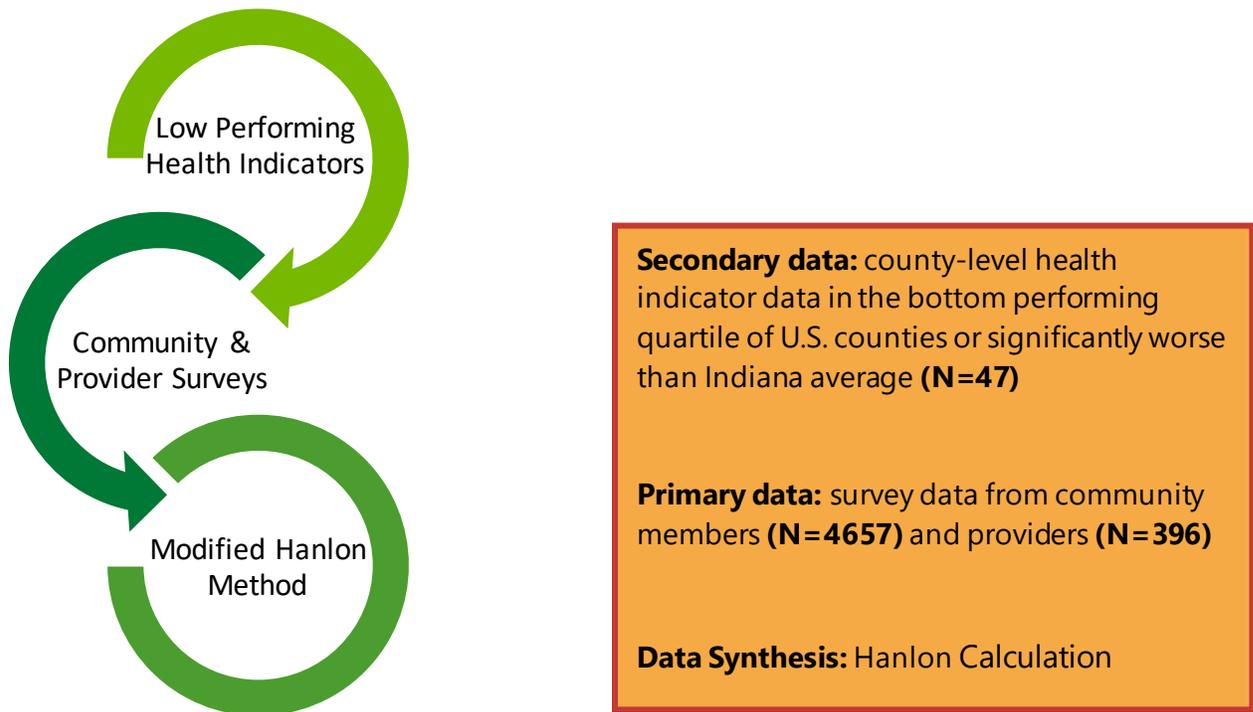

interpreting the findings. Although the health concerns and service needs represent a broad set of health-related issues, available secondary data varied in the number of related health indicators. For some health concerns, multiple health indicators have been established, while for other health concerns, the available health indicators were limited in number or relevance. The survey data was collected from a convenience sample as a random-sampling approach was not feasible in this type of project. As a result, the survey data are limited in the extent to which they represent the characteristics of the Parkview Health service area.

PRIORITIZATION OF HEALTH NEEDS

Data Synthesis

To organize and rank order significant health needs across the Parkview Health eight-county region, primary data from community and provider surveys and secondary data were combined using a modified Hanlon score (Figure 22). Each health indicator corresponded to a health concern from the survey, thus health domains from the survey were used to cluster health indicators.

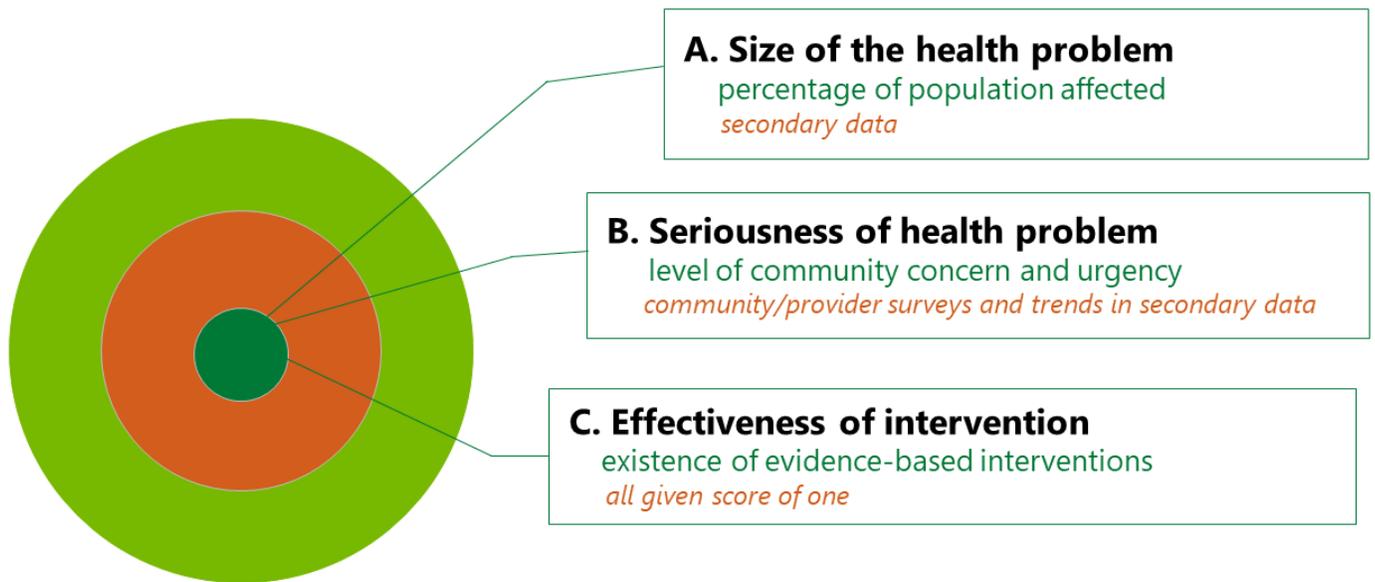

Figure 22. Culmination of Data to Create List of Top Ten Health Priorities

For each health indicator, scores for percentage of the population affected (size), percentage of community respondents endorsing the corresponding health concern (seriousness), percentage of provider respondents endorsing the corresponding health concern (seriousness), trend in health indicator (seriousness), and existence of evidence-based interventions (effectiveness of intervention) were assigned.

Figure 23 displays the separate elements comprising the Hanlon score (Appendix C). Hanlon Priority scores were calculated using the following equation: $\text{Priority Score D} = [A + (4.167 \times B)] \times C$

Figure 23. Modified Hanlon Method

As shown in Table 24, Hanlon scores ranged from 27.5 to 5.81 for the 31 bottom-performing health indicators, with higher scores indicating a higher priority. According to the Hanlon scores, the top health concerns were mental health, obesity, and chronic disease (see Table 24).

Prioritization Process

Parkview Wabash Hospital will adopt the health priority of Mental Health that was set for all hospitals in the Parkview Health system on August 22, 2022.

As a continuation of the prioritization process, Parkview Wabash Hospital held a community meeting on September 12, 2022 to engage Wabash County community leaders in helping determine two additional health priorities for the county over the next three years. The areas of education, government, social service agencies and recreation were all represented in the meeting, along with members of the Parkview Wabash Hospital administrative team (Appendix E).

The group of stakeholders conducted a thoughtful review of the 2022 CHNA data and engaged in a prioritization grid exercise (Appendix D), which involved examining the top 10 health priorities identified via survey of the community and local providers. The findings were summarized in the CHNA. Participants were then asked to rate significance, severity, suitability, and SDOH (Social Determinants of Health) for each of the 10 priorities.

Following this, the stakeholders were asked to vote on their top two recommendations for the two additional health priorities. Great discussion ensued before voting began. From this discussion, it was unanimously agreed upon that a vote was not necessary. All concurred that the following should be the health priorities for Wabash County: Substance Abuse/Use and Obesity.

The recommendations of the committee were presented to the Parkview Wabash Hospital Board Executive Planning committee on September 30, 2022. They voted unanimously to adopt Substance Abuse/Use and Obesity as additional priorities.

Table 24. Hanlon priority scores by bottom performing Healthcare Indicator

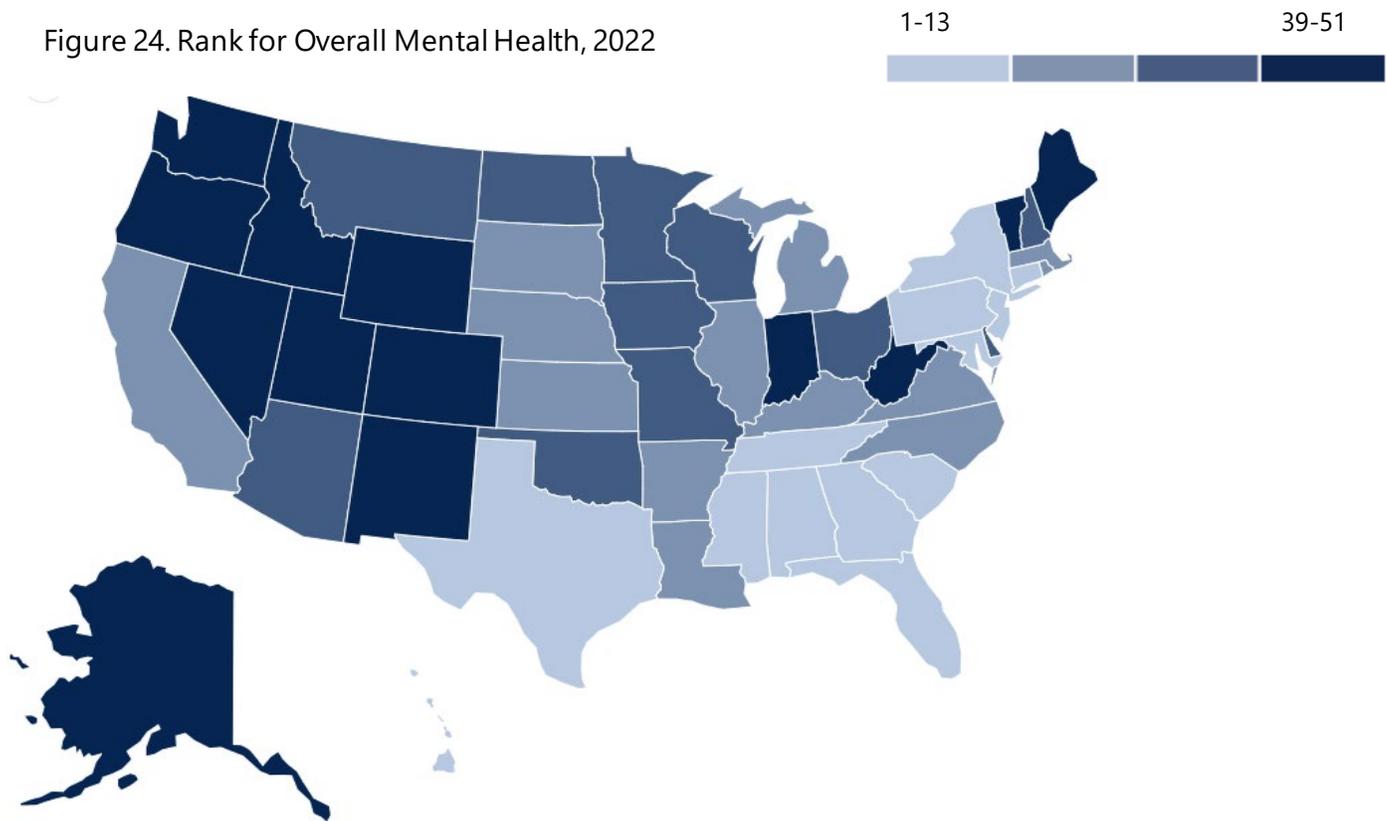

Survey Domain	Health Indicator	Size of Health Problem		Seriousness of Health Problem				Effectiveness of Intervention Score	Priority Score	Rank
		Size of Problem	Score	Community Concern	Provider Concern	Urgency	Score

Prioritized Health Needs

This section presents the top 10 health concerns included in the prioritization session. Mental Health was selected as the systemwide shared health priority for Parkview Health for 2022-2025.

Mental Health

Mental health is a critical component to overall physical health and a sense of well-being throughout the lifespan. However, as depicted in Figure 24, Indiana is one of the lowest ranked states across the U.S. In 2022, Indiana was ranked 26th for youth mental health, 43rd for adult mental health, and 42nd for overall mental health. These rankings incorporate measures of both prevalence of mental illness and access to mental health services. The following six conditions were included in defining 'overall' mental illness: (1) adults with any mental illness, (2) adults with substance use disorder in the past year, (3) adults with serious thoughts of suicide, (4) youth with at least one major depressive episode in the past year, (5) youth with substance use disorder in the past year, and (6) youth with severe major depressive episode.

Source: Mental Health in America

As shown in Table 25, the number of poor mental health days and percentage of adults experiencing frequent mental distress showed an increasing trend across all eight counties included in the Parkview Health service area. Though the ratio of mental health providers to the population improved from 2017 to 2020 in the Parkview Health service area, five counties were below the Indiana state level, and all eight counties were below the best performing counties in the U.S., which have a ratio of one mental health provider for every 250 people. For three counties, the number of deaths due to suicide increased from 2017 to 2020.

Table 25. Mental Health Indicators and Trends by County

County	Number of poor mental health days ¹ Average number in the past 30 days, age adjusted			Population: Mental health providers ² Ratio of Population: One Provider			Frequent mental distress % Adults reporting 14+ days poor mental health per month			Number of deaths due to suicide Count			Deaths due to suicide Age-adjusted rate per 100,000 population ³

Obesity

The medical criterion for obesity is met when body mass index is greater than 30.0. Obesity occurs in all age groups and disproportionately affects people of lower socioeconomic status and minority racial/ethnic groups. Many complications can occur as a direct or indirect result of obesity, such as high blood pressure, asthma, and low self-esteem (CDC Overweight & Obesity, 2022). Table 26 shows the percentage of adults with obesity. Rates of obesity in 2020 increased from 2017 in seven of eight counties in the Parkview Health service area and ranged from a low of 30.3% in DeKalb County to a high of 38.2% in Noble County. These high rates for obesity coincided with decreasing access to locations for physical activity, resulting in 21.8–28.5% of adults being physically inactive across the Parkview service area.

Table 26. Obesity Indicators and Trends by County

County	Adult obesity % Adults (>age 18) with BMI ≥ 30 kg/m ²			Physical inactivity % Adults (>age 18) with no leisure physical activity			Access to exercise opportunities % Population who have access to locations for physical activity

Chronic Disease

The following chronic diseases were scored highly and included in the prioritization session: chronic obstructive pulmonary disease, asthma, chronic kidney disease, cardiovascular disease, and diabetes.

Respiratory diseases, such as chronic obstructive pulmonary disease (COPD) and asthma, affect the lungs and other parts of the respiratory system. **COPD** includes a group of diseases that lead to breathing-related problems. As shown in Figure 25, age-adjusted prevalence of COPD is 6.6–11.9 in Indiana. Smoking is a leading cause of COPD. As shown in Table 27, rates of smoking tobacco increased from 2017 to 2020 in seven of eight counties in the Parkview Health service area.

Asthma is a chronic, incurable disease which makes breathing difficult due to the inflammation and narrowing of a person’s airways. Symptoms include wheezing, coughing and chest tightness (CDC Asthma, 2022a). Though rates for deaths from chronic lower respiratory disease improved in seven of eight counties in the Parkview Health service area, five counties sustained rates above the Indiana state level (see Table 28). Hospitalizations due to asthma showed improvement in four counties, while Emergency Department (ED) visits due to asthma improved in six counties. Unfortunately, trends in air pollution worsened for the entire Parkview Health service area.

Table 28. Asthma Indicators and Trends by county

County	Deaths due to chronic lower respiratory disease Age-adjusted rate per 100,000 population			Hospitalizations due to asthma Age-adjusted rate per 10,000 population			Emergency department visits due to asthma Age-adjusted rate per 10,000 population			Air pollution Average daily density of fine particulate

Chronic kidney disease develops as kidney function declines significantly over time. The body’s ability to filter wastes from blood becomes impaired and, if left untreated, can lead to kidney failure and death. In the early stages, kidney disease can be difficult to detect as physical symptoms are not present. Uncontrolled diabetes and high blood pressure are common causes of chronic kidney disease (*Chronic Kidney Disease Initiative | CDC, n.d.*). Table 29 shows that Huntington County had the highest age-adjusted death rate for kidney disease and the highest rate of chronic kidney disease among the Medicare population compared to the other seven counties.

Table 29. Chronic Kidney Disease Indicators and Trends by County

Cardiovascular disease affects the heart and blood vessels, potentially leading to heart attacks and strokes when blood is prevented from flowing to the heart or brain. Cardiovascular disease is estimated to be the leading cause of death worldwide. Table 30 shows that the percentage of adults experiencing a stroke from 2018 to 2019 was stable or improved in seven of eight counties in the Parkview Health service area. However, in five of eight counties, the rate of age-adjusted death from stroke increased from 2017 to 2020. Additionally, incidence of hospitalization due to stroke increased in seven counties during this time.

Table 30. Cardiovascular Disease (Stroke) Indicators and Trends by County

Coronary heart disease affects people of all races and genders, often emerges in mid-life, and may result from high cholesterol and blood pressure, adverse outcomes of diabetes, and/or a family history of heart disease (*Coronary Artery Disease* | CDC, 2021). Though the percentage of adults that experienced coronary heart disease improved from 2018 to 2019 in the Parkview Health service area, in all counties the percentage is higher than the Indiana state level (Table 31). Age-adjusted deaths due to coronary heart disease improved from 2017 to 2020 in six of eight counties; and age-adjusted deaths due to heart attack improved from 2017 to 2019 in six of seven counties (LaGrange County did not have available data). Only four of eight counties experienced a reduction in inpatient hospitalizations due to heart disease from 2017 to 2019.

Table 31. Cardiovascular Disease (Coronary Heart Disease) Indicators and Trends by County

Diabetes is a chronic disease in which blood glucose levels are elevated because the body does not produce enough insulin or does not use insulin effectively. Insulin is a hormone that is necessary for the maintenance of normal glucose levels. Chronically high blood sugar can lead to other more serious health complications such as heart disease and vision loss (*What is Diabetes?* | CDC, 2022b). In the United States, diabetes is the seventh leading cause of death and possibly underreported because one in five people who suffers from diabetes is undiagnosed (*Diabetes Quick Facts | Basics | Diabetes* | CDC, 2022). Table 32 shows that Wabash County had the highest age-adjusted death rate from diabetes, and Whitley County had the highest prevalence of diabetes in the Medicare population compared to the other seven Parkview counties.

Table 32. Diabetes Indicators and Trends by County

Substance Use and Abuse

Substance use and abuse involves illegal drug use, misuse of prescription drugs, alcohol abuse and tobacco use. The possible subsequent dependence on these substances can result in accidental death, unintentional injury, and other immediate and chronic health problems. Substance use disorders are preventable, and treatments are available. Huntington and Noble counties were above the Indiana state incidence rate for non-fatal drug overdose visits to the Emergency Department (Table 33). Allen, Kosciusko, and Wabash counties had increasing numbers of drug overdose deaths between 2017 and 2020. Allen, DeKalb, Kosciusko, and LaGrange counties were above the Indiana state percentage for adults reporting binge/heavy drinking, while Allen, Huntington, Noble, and Wabash counties were above the state percentage for driving deaths with alcohol involvement. Except for LaGrange County, all counties experienced increases in the percent of adults who smoke from 2017 to 2020.

Table 33. Substance Use/Abuse Indicators and Trends by County

Cancer

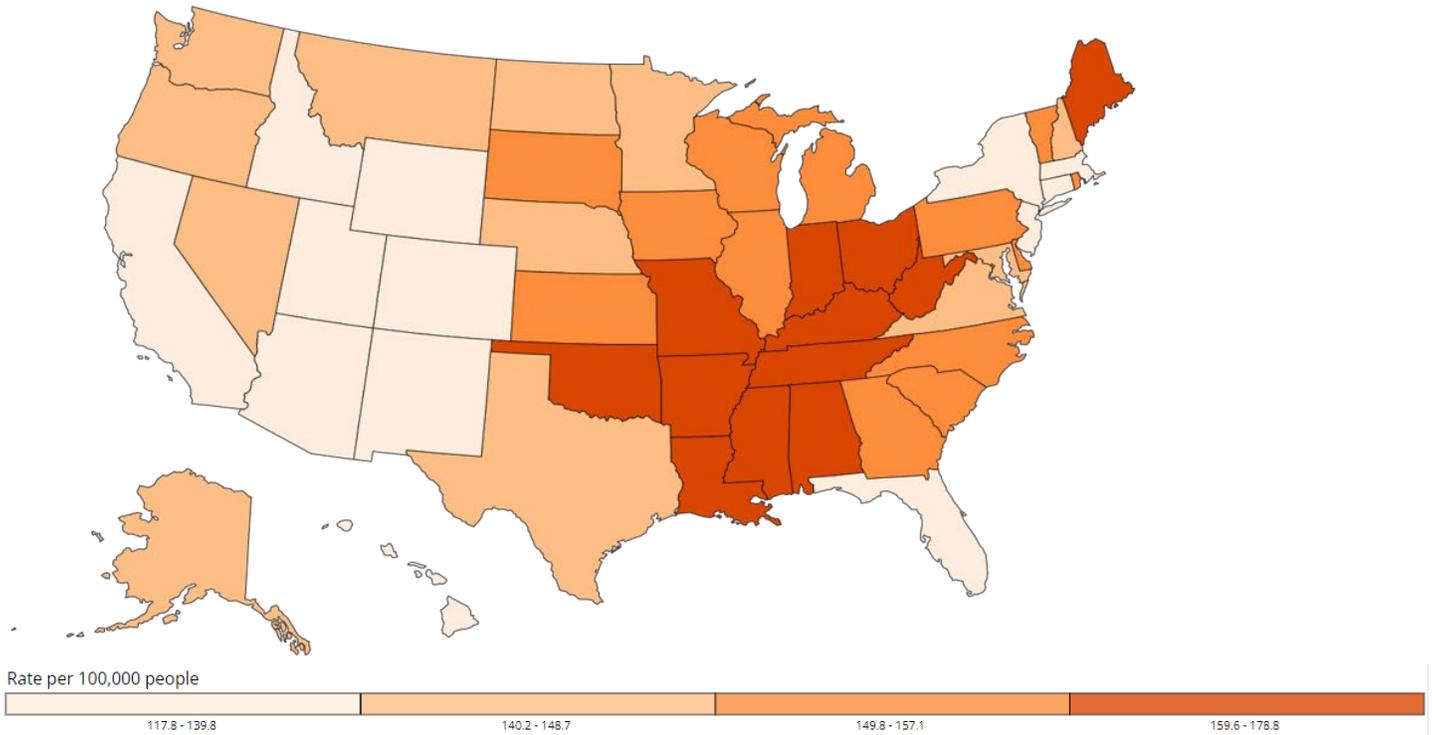

Collectively, cancer is the second leading cause of death in the United States. Table 34 presents the prevalence, incidence, and age-adjusted death rates of cancers by county. Kosciusko and Whitley counties had the highest age-adjusted incidence rate for breast cancer in 2018. Meanwhile, Allen and Wabash counties had the highest age-adjusted incidence rates for prostate cancer in 2018. For seven of eight counties, the age-adjusted incidence rate for lung and bronchus cancer increased from 2017 to 2018. In contrast, only two counties had increasing trends for colorectal cancer age-adjusted incidence rates.

Table 34. Cancer Indicators and Trends by County

County	Breast cancer Age-adjusted incidence rate per 100,000			Colorectal cancer Age-adjusted incidence rate per 100,000			Oral cavity and pharynx cancer Age-adjusted incidence rate per 100,000			Prostate cancer Age-adjusted incidence rate per 100,000			Lung and bronchus cancer Age-adjusted incidence rate per 100,000

Figure 26. Rate of Cancer Deaths in the U.S., 2019

Source: Centers for Disease Control and Prevention

As shown in Figure 26, Indiana is one of the U.S. states with the highest death rate from all cancer types. Age-adjusted death rates were highest for lung cancer in 2019 across all counties. Age-adjusted death rates for breast cancer showed improvement in five of eight counties; though, three of these counties had death rates above the Indiana state rate (see Table 35). Colorectal cancer age-adjusted death rates improved in four of eight counties between 2018 and 2019; while age-adjusted death rates due to prostate cancer improved in three of six counties between 2017 and 2019.

Table 35. Age-adjusted Death Rates for Cancer by County

County	Colorectal cancer Age-adjusted death rate per 100,000			Breast cancer Age-adjusted death rate per 100,000			Lung cancer Age-adjusted death rate per 100,000			Prostate cancer Age-adjusted death rate per 100,000

Alzheimer's Disease

Alzheimer's disease, the most common form of dementia among older people, is a chronic and progressive neurological disorder which affects and disrupts an individual's cognitive abilities, eventually rendering the person unable to perform basic tasks. Aging is the greatest known risk factor for Alzheimer's disease; while incurable, there are treatments available that can slow disease progression and improve quality of life. As shown in Table 36, the age-adjusted death rate from Alzheimer's disease is greater in Allen County compared to the state of Indiana. Moreover, the age-adjusted death rate from the disease has increased from 2017 to 2020 in Allen, Huntington, and Kosciusko counties. As shown in Figure 27, the prevalence of Alzheimer's disease in Indiana is predicted to increase by 17.4%-22.6% from 2020 to 2025 (*Alzheimer's Disease Facts and Figures*, n.d.).

Table 36. Alzheimer's Disease Indicators and Trends by County

APPENDICES

Appendix A – Impact Report

Overview

The findings of the 2019 CHNA guided our decision to adopt two health priorities for our community:

1. Mental health/substance use disorder
2. Obesity

The strategic goals of the mental health/substance abuse initiatives supported by Parkview Wabash Hospital are to:

1. Raise awareness of issues of mental health and substance use disorder in Wabash County
2. Partner with and/or support other organizations in their efforts to address the issues of mental health or substance use disorder

The strategic goals of obesity initiatives are to:

1. Reduce the incidence of obesity in Wabash County
2. Increase the activity level of Wabash County residents

Parkview Wabash Hospital has provided more than \$98,000 in funding, to external community partners, over the last three years to help improve the health of our community.

Community Impact

Mental Health/Substance Use Disorder

Mental health/substance use disorder was chosen by Parkview Wabash Hospital's (PBW) Board of Directors as our top community health priority.

In 2021, we established a partnership with Waypoint, transitional housing for Wabash County women with substance use disorder. Slated to open in the fall of 2022, the women will have a safe, stable environment in which to reside while they find employment and complete court mandated appointments and participate in therapy. Waypoint will house 12-13 women at a time. In 2021, monies provided helped them reach their fundraising goal in order to purchase, renovate and furnish the home. Funding provided in 2022 will be used to purchase drug screening and blood alcohol kits for testing the residents.

We continue to support the Wabash County Tobacco Free Coalition in their efforts to reduce the use of tobacco and tobacco products in Wabash County. One such initiative PWB supports is the Baby and Me Tobacco Free program, which began in 2016. Ten individuals have been trained as Baby and Me advisors. From January 2019 through June 2022, there have been 95 referrals to the program, resulting in 23 enrollments. Of those program participants, four graduated.

Wabash County Perinatal Smoking Program

	2019	2020	2021	2022 (June YTD)
Referrals	40	28	22	5
Enrollments	9	5	6	3
Graduates	2	2	0	0
Dropped Out	5	5	6	2
Active	N/A	N/A	N/A	1
% Wabash Co. Women Who Smoke	26.3%	17%	22.5%*	N/A

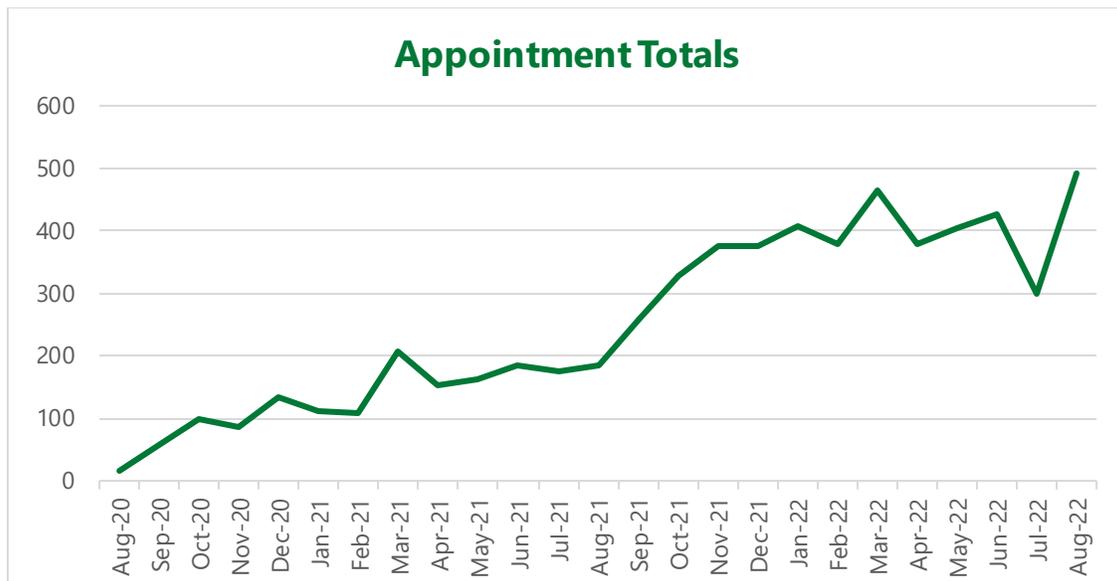

**data combined with Miami Co.*

PWB also partners with the Wabash County Tobacco Free Coalition on a Youth Prevention Program. The coalition educates Wabash County students in 2nd and 5th grade on the dangers of tobacco use. Every year, the coalition reaches more than 600 students county-wide. Additional classes are offered for any child caught on school grounds with tobacco products. About 30 children per year are referred to this program.

We also provided financial support to New Beginnings, a men's residential recovery facility. New Beginnings can serve up to eight men recovering from addiction through group meetings, Bible study and life skills training.

For the past two years, we have provided financial support to the Wabash County Drug Prevention Steering Committee. The committee is comprised of officials from agencies and organizations most directly involved with substance abuse issues, e.g., schools, probation department, judges, substance abuse professionals, and other social service agencies. Our financial support has allowed the group to hold public forums to increase awareness about substance abuse issues.

In July 2020, we opened a Medication Assisted Treatment program and Intensive Outpatient Therapy with the help of a Health Resources and Services Administration (HRSA) grant. We began seeing our first patients in August and have seen volumes grow exponentially.

Patients have seen great success in the program. A 2021 survey of existing patients demonstrated the positive impact of the program.

How comfortable do you feel about sharing your story with others?	2	1	2	2	13	
How well do you think your care plan meets your needs in this program?			1	5	12	2
Is this program helpful to you?			2	2	15	1

In 2021, the hospital began a medical stabilization program, a supervised withdrawal management service for adults over the age of 18. The medical stabilization is designed for patients who are acutely ill from alcohol related and/or substance related addictions or dependence. It also supports the medication management of patients undergoing severe withdrawal or those who are at risk of developing withdrawal symptoms. This is a voluntary service provided to patients with a diagnosis made by a physician of one or more of the following:

- alcohol use disorder
- opioid use disorder
- sedative, hypnotic, or anxiolytic use disorder
- stimulate use disorder

These patients are admitted by appointment only through the program coordinator. The goals of the program are:

- to decrease and stabilize patient's withdrawal symptoms
- to educate the patient on the withdrawal process
- completion of medical stabilization
- continued rehab placement

In 2021, 22 patients were admitted to the medical stabilization program, while six have been admitted through July 31, 2022.

Obesity

Obesity was chosen by our board as a secondary community health priority. As two healthcare leaders in Wabash County, Parkview Wabash Hospital and the YMCA have a strong and long-standing relationship. More than 40% of their membership receives financial assistance and cannot afford the cost of coaching. Through the YMCA's coaching program in partnership with the hospital, 113 participants on scholarship received coaching sessions at no cost over the three-year period.

Another project having an impact on physical activity is the addition of a nearly half mile loop walking path on our campus. The paved path circles our pond and will soon be completely accessible by sidewalks to and from the north side of the city in late 2019. Walkers and joggers are seen on the path daily. It also connects via sidewalk to the Charley Creek Trail, a $\frac{3}{4}$ mile paved path that extends from OJ Neighbours Elementary School to the Field of Dreams. Each year, Ford Meter Box, the county's largest employer, uses the path and pavilion as the start and end point of their annual 5K run/walk for co-workers. In late 2022/early 2023, we will break ground on a project to install a parking lot with three regular parking spaces and one handicapped spot. The lot will be adjacent to the pavilion, further promoting use of the path by making it more accessible. The project is funded by the Parkview Wabash Hospital Foundation.

We partnered with the Spikes and Bikes Club to help them grow the number of people participating in a weekly, one-hour bike ride called "Liking for Biking (L4B)." The program runs from May through September on Saturdays. With our funding, they could do more promotions, provide incentives and offer basic wellness screenings such as blood pressure, weight, blood sugar and BMI. In 2019, L4B averaged 25 riders per week, an increase of five people per week from the previous year. The number of people who signed up for the optional health screenings doubled in 2019 to 32 (compared to 16 in 2018). One person had perfect attendance – riding every Saturday; six people reported being more active as a result of L4B and eight people reported a two pound or more weight loss since beginning the program. While we still offered funding in 2020 and 2021, we were unable to provide the free screening portion of the program due to COVID-19. The steady momentum L4B had gained in their first two years was affected by the pandemic, however they were able to maintain a solid core of participants with an average of 16 riders per week in those two years. In a post-program survey, all participants stated they were "moving their bodies more," "had more energy," and/or "felt motivated."

The hospital was excited to work with the northern portion of the county by financially supporting the North Manchester Community Trails project, which will develop a scenic 1.6-mile asphalt trail, that will connect to additional trails already established. The project also includes a 10-space parking area to

accommodate anyone driving to the trails for a healthy walk or biking adventure. The goal is to help the town complete one of their comprehensive plan initiatives: health and wellness amenities.

Parkview Wabash Hospital offers two Check-Up Day events annually for community members. Unfortunately, due to COVID-19, we had to cancel one such event in 2020 and one in 2021. These screening events offer discounted lab work to promote well-being. Despite cancellations, we were still able to provide this great service to 272 people over the last three years.

Conclusion

The Community Health Program at Parkview Wabash Hospital has built strong partnerships with social service agencies and organizations within the county to positively impact the overall health and well-being of the community in which we work and live. Though gains are sometimes small, they are positive gains. An increased number of people have become active at the YMCA and in the Liking for Biking program, and we have been able to collaborate with other groups who share our mission of improving the health and well-being of pregnant women and young children. Together, we are building a healthier Wabash County.

Appendix B - Community and Provider Surveys

Invitation to take the Parkview Community Health Needs Survey

Dear Community Member,

We need your help! We all know the importance of a strong community and strong community services. Parkview Health is working to identify community health needs so we can provide better services.

Your Answers Count! Your responses are completely confidential. We do not ask for your name anywhere on the survey. You must be 18 years of age or older to take this survey. The questions will take only about 5-10 minutes of your time.

If you have any questions or need any help with the survey, please call U.S. at 260-266-7765.

You can also take the survey online: <https://www.research.net/r/CHNA6E> or

Thank you for helping U.S. build a stronger community!

Sincerely,

A handwritten signature in black ink that reads 'Sarah GiaQuinta, MD'. The signature is written in a cursive style.

Sarah GiaQuinta, MD, MPH
Vice President of Community Health
Parkview Health

Parkview Community Health Needs Survey

These questions should only take about 5 - 10 minutes to complete. Your answers are confidential and will only be reported in combination with the answers of others. Your participation is voluntary; you may stop answering at any time, or skip questions you do not wish to answer.

1. In which county do you live?

- Adams Allen DeKalb Huntington Kosciusko LaGrange Noble
- Wabash Wells Whitley

2. What is the zip code of your residence? _____

3. How many adults (18 years or older) live in your household, INCLUDING YOURSELF? _____

- INCLUDE all adults who are living or staying here for more than 2 months
- DO NOT INCLUDE anyone who is living somewhere else for more than 2 months, such as a college student living away or someone in the Armed Forces on deployment

4. How many children younger than 18 years of age live in your household? _____

5. How would you describe your gender? (select only one)

- Male Other _____
- Female Prefer not to answer
- Transgender

6. In what year were you born? _____

7. Are you of Hispanic or Latino origin?

- Yes No Prefer not to answer

8. Do you identify as Amish?

- Yes No Prefer not to answer

9. How would you describe your race? (select all that apply)

- White
- Asian
- Black or African-American
- Native Hawaiian or Pacific Islander
- American Indian or Alaska Native
- Prefer not to answer
- Other: _____

10. Below are some health issues present in many communities. Please pick FIVE that you think pose the greatest concern for people who live in your community. (select only five)

- Tobacco/vaping use
- Substance use or abuse
- Alcohol use or abuse
- Assault and violent crime (including domestic violence)
- Child abuse or neglect
- Sexual violence (including assault, rape or human trafficking)
- Obesity (health problems due to being overweight or obese)
- Chronic disease (diabetes, cancer, heart disease, etc.)
- Suicide
- Infectious disease (HIV, syphilis, hepatitis, COVID-19, or other infections)
- Reproductive health (birth control, women's and men's reproductive health issues)
- Infant death
- Injuries (car accidents, falls, workplace injuries)
- Mental health
- Aging and older adult needs
- Dental Care
- Disability needs

11. Below is a list of programs or services that exist in many communities. Thinking about the biggest needs in your community, please rank the importance of each with 5 being the most important and 1 being the least important.

Category	1 Least Important	2	3	4	5 Most Important
Access to Food (such as food pantries, farmers markets, food stamps)	<input type="checkbox"/>				
Assistance with finding housing	<input type="checkbox"/>				
Financial assistance	<input type="checkbox"/>				
Legal assistance	<input type="checkbox"/>				
Assistance with getting health insurance	<input type="checkbox"/>				
Job training or assistance with finding a job	<input type="checkbox"/>				
Assistance with transportation	<input type="checkbox"/>				
Free or emergency childcare	<input type="checkbox"/>				
Nutrition education programs like healthy cooking classes	<input type="checkbox"/>				
Substance abuse services (prevention or treatment)	<input type="checkbox"/>				
Needle exchange programs	<input type="checkbox"/>				
Mental health counseling and support programs	<input type="checkbox"/>				
Gun safety education programs	<input type="checkbox"/>				
Access to birth control	<input type="checkbox"/>				
Walking trails, bike trails, and other outdoor recreation spaces	<input type="checkbox"/>				
Quick access primary care (like clinics in a local drug store or grocery store)	<input type="checkbox"/>				
Aging and older adult programs	<input type="checkbox"/>				
Assistance with filling a prescription	<input type="checkbox"/>				

12. Considering all sources, which of the following best describes your total household income before taxes for 2020? (select only one)

- Less than \$15,000
- \$15,000 - \$24,999
- \$25,000 - \$34,999
- \$35,000 - \$49,999
- \$50,000 - \$74,999
- \$75,000 - \$99,999
- \$100,000 - \$149,999
- \$150,000 or More
- Prefer not to answer

Invitación a participar en la encuesta sobre las necesidades de salud de la comunidad de Parkview Health

Estimado miembro de la comunidad:

¡Necesitamos su ayuda! Todos conocemos la importancia de una comunidad fuerte y de servicios comunitarios sólidos. Parkview Health está trabajando para identificar las necesidades de salud de la comunidad para poder ofrecer mejores servicios.

¡Sus respuestas son importantes! Sus respuestas son completamente confidenciales. No le pedimos su nombre en ninguna parte de la encuesta. Debe tener 18 años o más para participar en esta encuesta. Las preguntas le tomarán solo entre 5 y 10 minutos de su tiempo.

Si tiene alguna pregunta o necesita ayuda con la encuesta, llámenos al 260-266-7765.

También puede participar en la encuesta en línea:

<https://es.research.net/r/CHNA7S> o

¡Gracias por ayudarnos a construir una comunidad más fuerte!

Cordialmente,

A handwritten signature in black ink that reads 'Sarah GiaQuinta, MD'. The signature is written in a cursive style.

Sarah GiaQuinta, MD, MPH
Vicepresidente de Comunidad Salud
Parkview Health

Encuesta sobre las necesidades de salud de la comunidad de Parkview Health

Debería llevarle solo entre 5 y 10 minutos responder esta encuesta. Sus respuestas son confidenciales y solo se informarán en combinación con las respuestas de otras personas. Su participación es voluntaria; puede dejar de responder en cualquier momento u omitir las

preguntas que no desee contestar.

1. **En qué condado vive?**

- Adams Allen DeKalb Huntington Kosciusko LaGrange Noble
 Wabash Wells Whitley

2. **Cuál es el código postal de su residencia?** _____

¿Cuántos adultos (mayores de 18 años) viven en su hogar, INCLUYÉNDOSE A USTED MISMO? _____

- INCLUYA a todos los adultos que vivan o estén viviendo aquí por más de 2 meses
- NO INCLUYA a nadie que haya vivido en otro lugar por más de 2 meses, como un estudiante universitario que viva fuera o alguien de las fuerzas armadas en misión

3. **Cuántos menores de 18 años viven en su hogar?** _____

4. **Cómo describiría su género? (seleccione solo uno)**

- Hombre Otro _____
 Mujer Prefiero no contestar
 Transgénero

5. **En qué año nació?** _____

6. **Es U.S.ted de origen hispano o latino?**

- Sí No Prefiero no contestar

7. **Se identifica como Amish?**

- Sí No Prefiero no contestar

8. ¿cómo describiría su raza? (seleccione todo lo que corresponda)

- | | |
|---|--|
| <input type="checkbox"/> Blanco | <input type="checkbox"/> Asiático |
| <input type="checkbox"/> Negro o afroamericano | <input type="checkbox"/> Nativo de Hawái o de las islas del Pacífico |
| <input type="checkbox"/> Indio americano o nativo de Alaska | <input type="checkbox"/> Prefiero no contestar |
| <input type="checkbox"/> Otros: _____ | |

9. A continuación se presentan algunos problemas de salud presentes en muchas comunidades. Por favor, elija CINCO que en su opinión sean los que más les preocupan a las personas que viven en su comunidad. (seleccione solo cinco)

- Consumo de tabaco/vapeo
- Uso o abuso de sustancias
- Uso o abuso del alcohol
- Agresión y delitos violentos (incluida la violencia doméstica)
- Abuso o negligencia infantil
- Violencia sexual (incluido el abuso, la violación o la trata de seres humanos)
- Obesidad (problemas de salud debidos al sobrepeso o la obesidad)
- Enfermedades crónicas (diabetes, cáncer, enfermedades del corazón, etc.)
- Suicidio
- Enfermedades infecciosas (VIH, sífilis, hepatitis, COVID-19 u otras infecciones)
- Salud reproductiva (anticonceptivos, cuestiones de salud reproductiva de mujeres y hombres)
- Muerte infantil
- Lesiones (accidentes de tráfico, caídas, lesiones en el lugar de trabajo)
- Salud mental
- Envejecimiento y necesidades de los adultos mayores
- Atención odontológica
- Necesidades de las personas con discapacidades

10. A continuación se presenta una lista de programas o servicios que existen en muchas comunidades. Pensando en las mayores necesidades de su comunidad, clasifique la importancia de cada una de ellas, siendo 5 la más importante y 1 la menos importante.

Categoría	1 Menos importante	2	3	4	5 Más importante
Acceso a alimentos (como las despensas, los mercados de agricultores, los cupones de alimentos)	<input type="checkbox"/>				
Asistencia en la búsqueda de vivienda	<input type="checkbox"/>				
Asistencia financiera	<input type="checkbox"/>				
Asistencia jurídica	<input type="checkbox"/>				
Asistencia para conseguir un seguro médico	<input type="checkbox"/>				
Capacitación laboral o ayuda para encontrar un trabajo	<input type="checkbox"/>				
Asistencia para el transporte	<input type="checkbox"/>				
Cuidado de niños/as gratuito o de emergencia	<input type="checkbox"/>				
Programas de educación nutricional como clases de cocina saludable	<input type="checkbox"/>				
Servicios de abuso de sustancias (prevención o tratamiento)	<input type="checkbox"/>				
Programas de intercambio de jeringas	<input type="checkbox"/>				
Programas de terapia y apoyo en materia de salud mental	<input type="checkbox"/>				
Programas de educación sobre la seguridad de las armas	<input type="checkbox"/>				
Acceso a anticonceptivos	<input type="checkbox"/>				
Rutas de senderismo, carriles para bicicletas y otros espacios recreativos al aire libre	<input type="checkbox"/>				
Acceso rápido a la atención primaria (como clínicas en una farmacia o un supermercado local)	<input type="checkbox"/>				
Programas para adultos mayores y envejecimiento	<input type="checkbox"/>				
Asistencia para surtir una receta	<input type="checkbox"/>				

11. Teniendo en cuenta todas las fuentes, ¿cuál de las siguientes opciones describe mejor los ingresos totales de su hogar antes de impuestos para 2020? (seleccione solo uno)

- | | |
|--|--|
| <input type="checkbox"/> Menos de \$15,000 | <input type="checkbox"/> \$75,000 - \$99,999 |
| <input type="checkbox"/> \$15,000 - \$24,999 | <input type="checkbox"/> \$100,000 - \$149,999 |
| <input type="checkbox"/> \$25,000 - \$34,999 | <input type="checkbox"/> \$150,000 o más |
| <input type="checkbox"/> \$35,000 - \$49,999 | <input type="checkbox"/> Prefiero no contestar |
| <input type="checkbox"/> \$50,000 - \$74,999 | |

ရပ်ရွာကျန်းမာရေး လိုအပ်ချက်များ Parkview's စစ်တမ်းတွင် ပါဝင်ရန် ဖိတ်ကြားခြင်း။

Welcome!

The purpose of this survey is to help meet the Internal Revenue Service (IRS) requirement from the Affordable Care Act that non-profit hospitals conduct a community health needs assessment every three years.

This survey includes 12 questions and will require approximately 5-10 minutes of your time. It asks questions about your practice setting and the primary community health issues, social service needs, barriers to healthcare access, and problems in providing service in the county(ies) you serve. Your responses will not be connected back to you as an individual and will only be used and published in aggregated format.

This survey is being conducted as part of Parkview Health's 2022 Community Health Needs Assessment (CHNA).

Thank you in advance for completing this survey!

YOUR PRACTICE SETTING

1. In which county is your primary practice or service located?

- ◆ Adams ◆ Allen ◆ DeKalb ◆ Huntington ◆ Kosciusko ◆ LaGrange ◆ Noble
- ◆ Wabash ◆ Wells ◆ Whitley

2. How long have you practiced/provided service in this area?

- ◆ Less than 1 year ◆ 1-5 years ◆ 6-10 years ◆ 11-15 years ◆ 16-20 years
- ◆ More than 20 years

3. What type of healthcare or service provider are you?

- Physician
- Physician's Assistant
- Nurse Practitioner
- Registered Nurse
- Mental/Behavioral Health
- Nutritionist
- Wellness Practitioner
- Public Health/Community Health Practitioner
- Social Worker/Case Management
- Other, please specify

4. In which type of setting do you provide your services?

- Outpatient Primary Care Clinic
- Outpatient Specialized Care Clinic
- Immediate/Urgent Care Clinic
- Community Health Center
- County Health Department
- Hospital - Specialized Care
- Hospital - Emergency Care

- Long-Term Care Facility
- Hospice/Palliative Care Facility
- School
- In-Home
- Other, please specify

COMMUNITY HEALTH NEEDS

5. Below are some health issues present in many communities. Please pick FIVE that you think pose the greatest concern for people who live in your community. (Select only five)

- Tobacco/vaping use
- Substance use or abuse
- Alcohol use or abuse
- Assault and violent crime (including domestic violence)
- Child abuse or neglect
- Sexual violence (including assault, rape or human trafficking)
- Obesity (health problems due to being overweight or obese)
- Chronic disease (diabetes, cancer, heart disease, etc.)
- Suicide
- Infectious disease (HIV, syphilis, hepatitis, COVID-19, or other infections)
- Reproductive health (birth control, women's and men's reproductive health issues)
- Infant death
- Injuries (car accidents, falls, workplace injuries)
- Mental health
- Aging and older adult needs
- Dental care
- Disability needs

6. Which of the following are the top three barrier(s) to accessing care/services in your county?

- Costs
- Lack of Insurance
- Access/Insufficient Healthcare Resources (i.e. shortage of providers)
- Transportation
- Education/Health Literacy
- Childcare
- Language
- Housing
- Other; please specify

SERVICE NEEDS

7. Below is a list of programs or services that exist in many communities. Thinking about the biggest needs in your community, please rank each by importance with 5 being the most important and 1 being the least important.

Category	1 Least Important	2	3	4	5 Most Important
Access to Food (such as food pantries, farmers markets, food stamps)	◆	◆	◆	◆	◆
Assistance with finding housing	◆	◆	◆	◆	◆
Financial assistance	◆	◆	◆	◆	◆
Legal assistance	◆	◆	◆	◆	◆
Assistance with getting health insurance	◆	◆	◆	◆	◆
Job training or assistance with finding a job	◆	◆	◆	◆	◆
Assistance with transportation	◆	◆	◆	◆	◆
Free or emergency childcare	◆	◆	◆	◆	◆
Nutrition education programs like healthy cooking classes	◆	◆	◆	◆	◆
Substance abuse services (prevention or treatment)	◆	◆	◆	◆	◆
Needle exchange programs	◆	◆	◆	◆	◆
Mental health counseling and support programs	◆	◆	◆	◆	◆
Gun safety education programs	◆	◆	◆	◆	◆
Access to birth control	◆	◆	◆	◆	◆
Walking trails, bike trails, and other outdoor recreation spaces	◆	◆	◆	◆	◆
Quick access primary care (like clinics in a local drug store or grocery store)	◆	◆	◆	◆	◆
Aging and older adult programs	◆	◆	◆	◆	◆
Assistance with filling a prescription	◆	◆	◆	◆	◆

8. Are you aware of resources available to the community to address the following issues? (Answer Yes, No, or Don't Know for each)

Category	Yes	No	Don't Know
Access to Food (such as food pantries, farmers markets, food stamps)	◆	◆	◆

Assistance with finding housing	◆	◆	◆
Financial assistance	◆	◆	◆
Legal assistance	◆	◆	◆
Assistance with getting health insurance	◆	◆	◆
Job training or assistance with finding a job	◆	◆	◆
Assistance with transportation	◆	◆	◆
Free or emergency childcare	◆	◆	◆
Nutrition education programs like healthy cooking classes	◆	◆	◆
Substance abuse services (prevention or treatment)	◆	◆	◆
Needle exchange programs	◆	◆	◆
Mental health counseling and support programs	◆	◆	◆
Gun safety education programs	◆	◆	◆
Access to birth control	◆	◆	◆
Walking trails, bike trails, and other outdoor recreation spaces	◆	◆	◆
Quick access primary care (like clinics in a local drug store or grocery store)	◆	◆	◆
Aging and older adult programs	◆	◆	◆
Assistance with filling a prescription	◆	◆	◆

9. What problems and barriers do you face in providing health-related services (please check all that apply)?

- Collaboration/communication with other provider/coordinated care
- Effective quality improvement strategies
- Electronic medical records/electronic health records
- Access to timely data
- Relationship with insurers/reimbursement levels
- Insufficient healthcare resources (i.e. shortage of providers)
- Language barriers
- Other, please specify

DEMOGRAPHICS

10. How would you describe your gender?

- Male
- Female
- Transgender
- Other:
- Prefer not to answer

11. Are you of Hispanic or Latino origin?

- Yes
- No
- Prefer not to answer

12. How would you describe your race? (Select all that apply)

- White
- Black or African American
- Asian
- Native Hawaiian or other Pacific Islander
- American Indian or Alaskan Native
- Other:
- Prefer not to answer

Appendix C - Hanlon Score Calculation

(A) Size		(B) Seriousness				(C) Effectiveness of Intervention	
Score	% of Population	Score	Community (B1) and Provider (B2) % endorsed	Score	Urgency (B3)	Score	Evidence-based intervention
10	≥ 50%	2	≥ 80%	2	Significantly worsening	Yes	1
9	25 to < 50%	1.5	60 to < 80%	1.5	Worsening	No	0
8	17.5 to < 25%	1	40 to < 60%	1	No trend		
7	10 to 17.5%	0.5	20 to < 40%	0.5	Improving		
6	5 to < 10%	0	0 to < 20%	0	Significantly improving		
5	1 to < 5%						
4	0.50 to < 1%						
3	0.10 to < 0.50%						
2	0.05 to < 0.10%						
1	0.01 to < 0.05%						
0	0 to < 0.01%						

Priority Score D = $[A + 4.167 * (B1 + B2 + B3)] * C$

Appendix D - Prioritization Tool

2022 Wabash County CHNA: Scorecard to Prioritize Top Health Needs

Please review this scorecard and accompanying data in advance of the Prioritization Session. During the session, information and instructions will be provided that will help to contextualize the health problems and ranking scores presented in the table below and the data provided in the subsequent pages. You will be asked to consider both your professional and personal perspectives when you rate each health problem as we work to prioritize Parkview's top health needs.

Prioritization Criteria

- **Significance** of the health problem -> How many people are affected?
- **Severity** of the health problem -> How likely is it to limit length and quality of life?
- **Suitability** for a strategic intervention-> is Parkview in a good position to address the problem?
- **SDOH** -> Do social determinants of health (SDOH) drive health disparities in rates and outcomes for the health problem?

	Priority Rank by Hanlon	Priority Rank by Community & Provider Survey	Significance of the Issue	Severity of the Problem	Suitability for Intervention	SDOH – Impact of Health Disparity
Health Problem	1= top priority	* Chronic disease was a single question in our survey	1-10	1-10	1-10	1-10
Mental Health	1	3				
Chronic Obstructive Pulmonary Disease (COPD)	2	*4				
Asthma	3	1				
Obesity	4	*4				
Chronic Kidney Disease	5	*4				
Cardiovascular Disease	6	*4				
Cancer	7	*4				
Alzheimer's disease or dementia	8	2				
Substance Use/ Abuse	9	-				
Diabetes	10	*4				

Note: for voting you will be asked to use the following scale: **1=Very Little, 10=Very Much**

Appendix E - Prioritization Participating Organizations

Prioritization session attendees represented several organizations in Wabash County:

Organization/Department
Wabash City Government
Wabash Community Foundation
Parkview Administration
Wabash City Schools
Manchester Community Schools
Metropolitan School District of Wabash County
Waypoint Women's Recovery Home
Wabash YMCA

Appendix F - Community Resources

Findhelp.org is an online to that allows the end user to search and connect to support, including financial assistance, food pantries, medical care, and other free or reduced-cost help.
