

Parkview Community Health Needs Assessment

Prioritization Session &
Community Forum

March 13, 2025

Many thanks to all who partnered with us to ensure a successful and meaningful CHNA!

Objectives of the Community Health Needs Assessment

- As a not-for-profit hospital system, Parkview Health is responsible for conducting a CHNA every 3 years for each community served by a Parkview Hospital. The last CHNA was completed in 2022.
- Data from the CHNA is used to identify priority health needs in the communities we serve and is integral to Parkview's community health improvement strategies and investments.

2022 Parkview LaGrange Priorities

Mental Health

- Focus on Substance Use/Abuse and Suicide Prevention

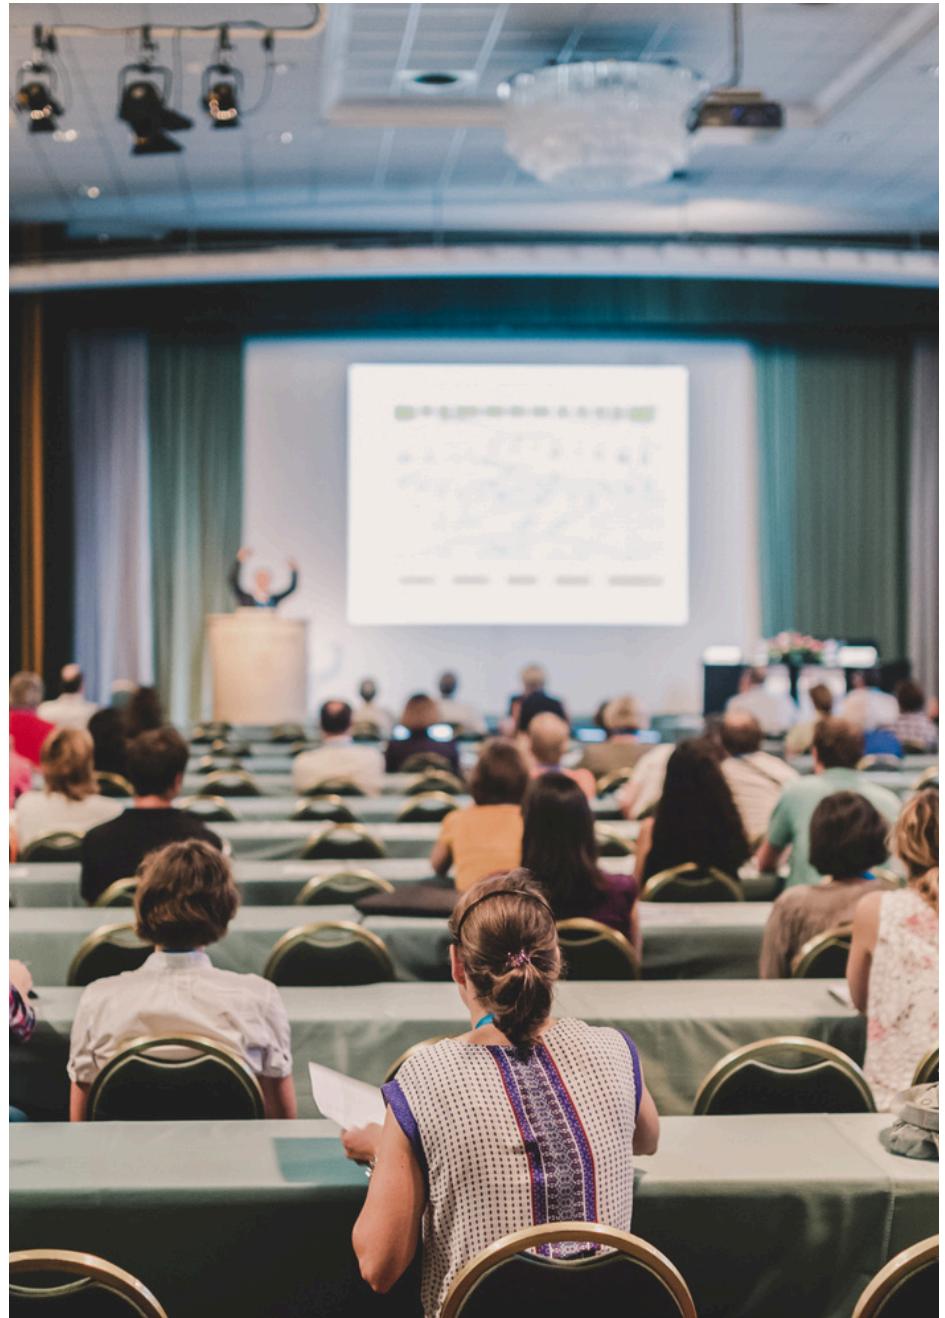

Child Abuse and Maltreatment

Obesity

Agenda

- 1** Overview of the 2025 CHNA
- 2** Data trends related to the top 5 identified health needs
- 3** Prioritization of top 2-3 health needs
- 4** Breakout discussions on health concerns, social needs, and access to care in your community

Prioritization Session Agenda (60 minutes)

Introductions / Review of Meeting Goals

Presentation of CHNA Results

- Overview of CHNA process & scoring of health priorities
- Results of evidence-based prioritization
- Review of the **DATA TRENDS** related to top health indicators

Prioritization Voting

- Voting & discussion to rank order top health priorities
- Chatham House Rule to promote open sharing / productive dialogue
 - Provide **1 pro – 1 con – 1 con – 1 pro** for each health priority being considered before moving to the next one

Community Forums (60 minutes)

Led by moderator with focused prompts & a note taker

Aims

- Provide context for community needs
- What assets are in place or needed to address the needs
- Bring community together around top health concerns

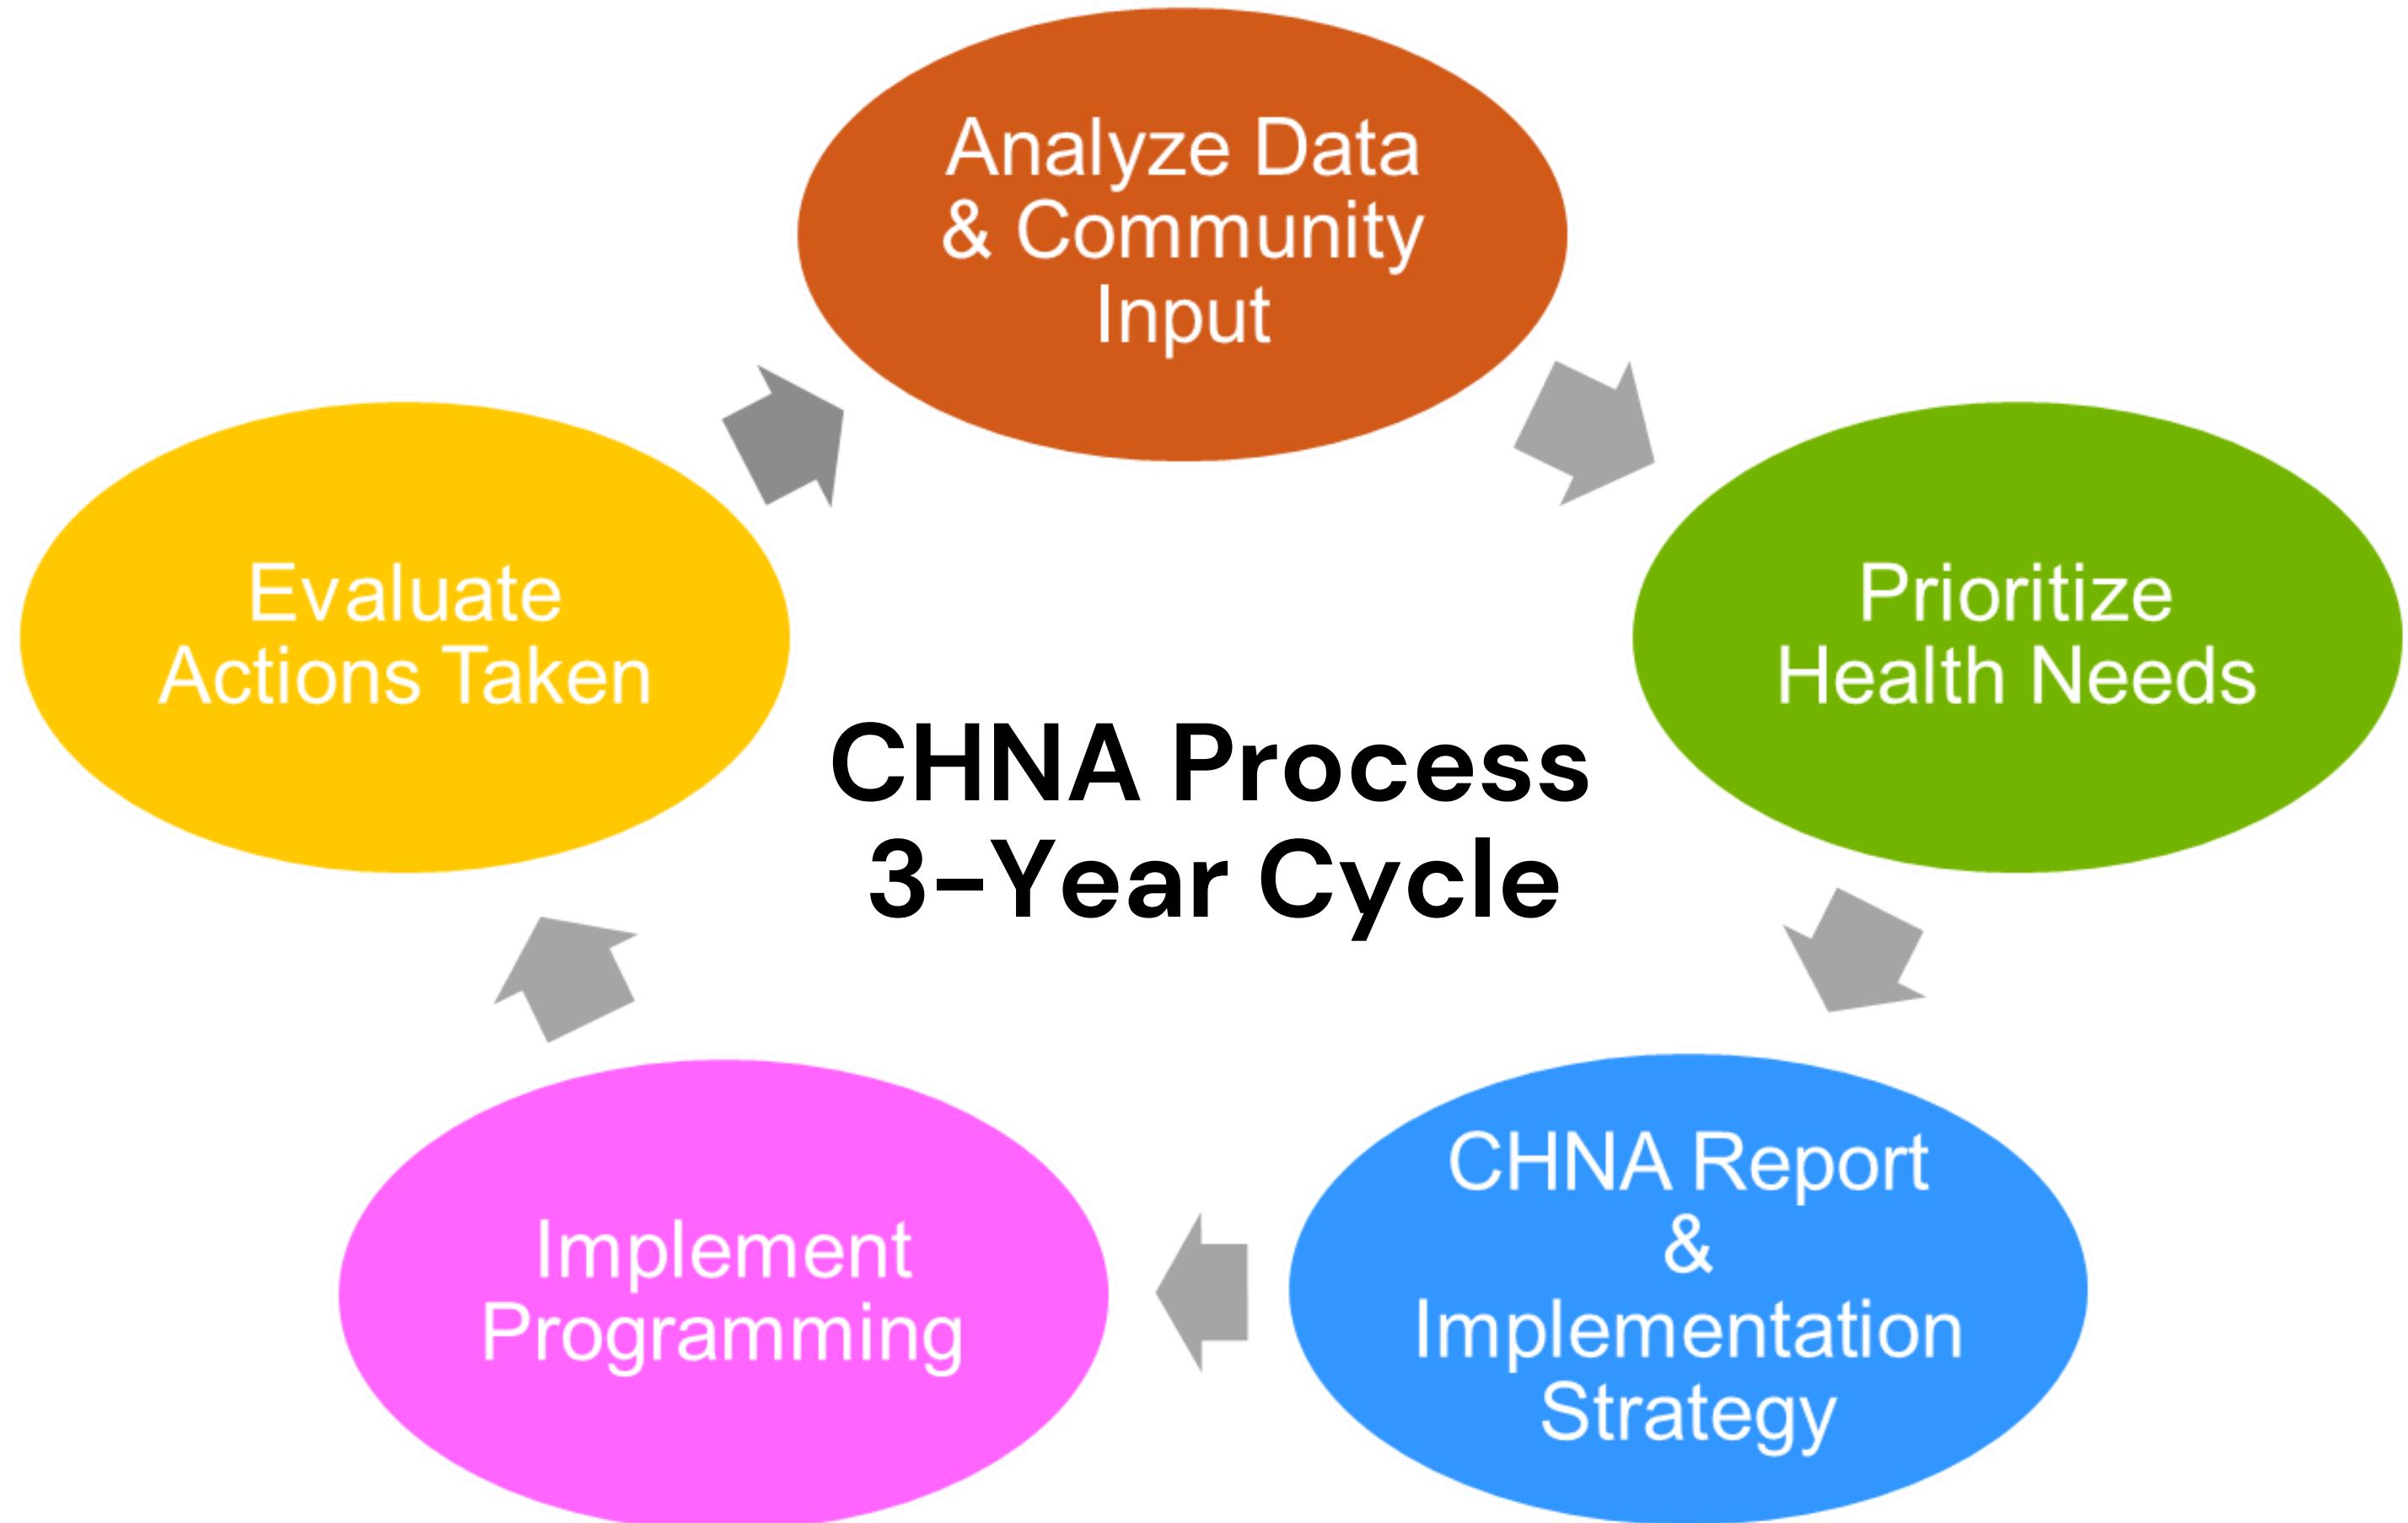

Breakout groups
(8-10 participants/group)

- Breakout group #1 – access to care
- Breakout group #2 – social needs
- Breakout group #3 – top health concern(s) for your county
- *Breakout group #4 (optional) – any of the above group topics*

A note on secondary data

You may notice that some of the numbers presented differ from what was seen in earlier presentations. Why?

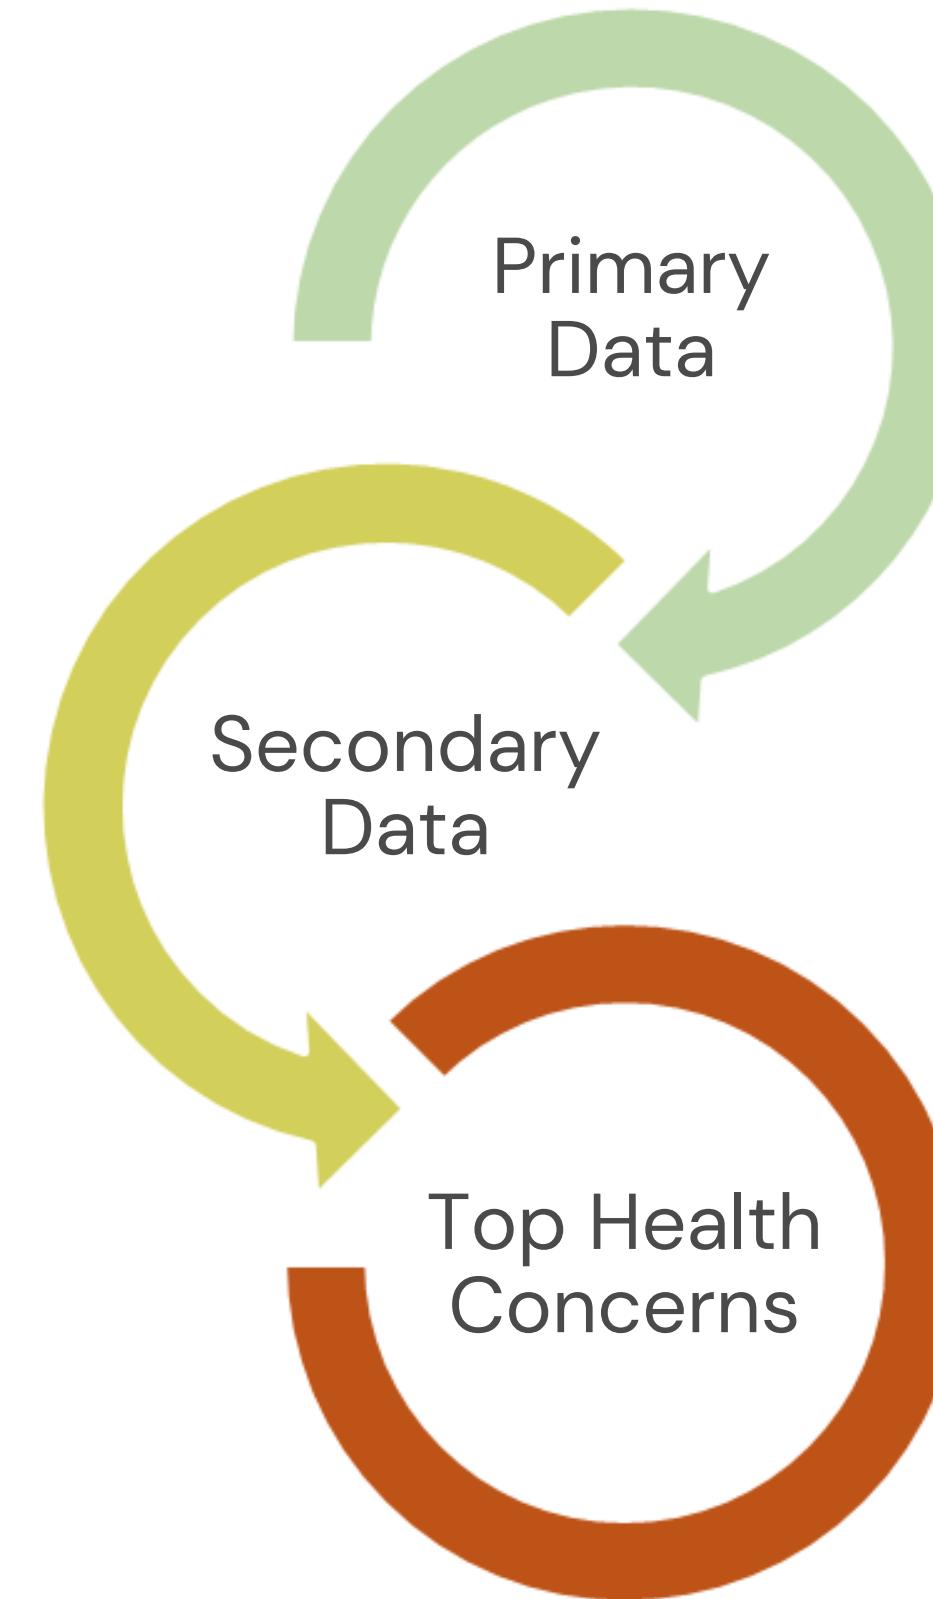

- Public health data are not static. Agencies like the CDC continue to receive new reports, verify information and improve analytic methods even after data are first published.
- When this happens, previously reported numbers may be updated.
- These updates are normal and reflect stronger, more complete information.
- Updates usually **do not** change the actual severity of public health issues.
