

PARKVIEW VALUE PLUS

Our Chronic Condition Management Program is supported by our financial commitment to impact your member's care, and your bottom line as an employer. This program is exclusively offered as a partnership between Parkview Health & Unified Group Services.

Parkview's dedicated Care Coordination Team will connect at the member & employer level to:

- Analyze historical and ongoing data to identify conditions that can be managed for improved outcomes.
- Collaborate with Parkview's team of nurses, clinical, social workers, pharmacists and more to identify the best approach for your specific population.
- Coordinate wellness screenings to establish a baseline of health through biometric data.
- Engage members through direct outreach.
- Prepare a quarterly reporting package to evaluate progress of the program.

Parkview Value Plus includes a Risk-Sharing Component

We believe in the outcomes that can be provided through this program, and we will share the risk with you:

If your claims are 15% or below the annualized expected claims based on your renewal, Parkview will receive 7.5% of that savings, and the employer absorbs the remaining 7.5%. Alternatively, if the annualized expected claims exceed 15% of the projected renewal, Parkview will reimburse the employer 7.5% of the amount that exceeded the expected annualized cost.
